Fisher Scientific* High-Purity and HF Bottle-Top Acid Dispensers

Combine the convenience of traditional pump dispensers with the chemical compatibility and high purity of TFM* PTFE

BT-BL with optional base (BT-BASE), Acid not included

The Baseline* model can be used with high-purity concentrated acids, including hydrofluoric acid.

- All wetted parts are constructed of PFA and high-purity TFM* PTFE (a chemically modified PTFE), including check valves and seals
- Volumes can be adjusted from 0.5 to 5.0mL in 0.5mL increments using the dial at the top of the handle
- Design permits one-handed operation
- Comes with 38–430 cap adjuster; additionally with the Baseline model is a 0.2µm air filter
- Accuracy, ±0.02mL; precision, ± 3% at 3mL
- Optional base (Cat. No. BT-BASE) provides stability

Baseline Bottle-Top Dispenser (BT-BL)

- All wetted parts have been extensively acid precleaned
- Precleaned parts are assembled under Class 100 or better cleanroom conditions
- Calibrated and mechanically tested to ensure it meets required volume, precision and accuracy requirements
- Unit is filled with high-purity Nitric Acid for further cleaning and mechanical testing
- Rinsed thoroughly with high purity water to remove residual acid
- Packaged under Class 100 or better cleanroom conditions

HF Acid Bottle-Top Dispenser (BT-HF)

- For applications that require the chemical resistance of PTFE, such as ASC or Technical-Grade acids (including hydrofluoric acid)
- Calibrated and mechanically tested to ensure required volume, precision and accuracy requirements

Description	Cat. No.	Each
Baseline Dispenser	BT-BL	1499.58
HF Acid Dispenser	BT-HF	1120.07

Fisher Scientific* High-Purity and HF Bottle-top Dispenser Base

Accommodates 250 to 2000mL bottles and stabilizes the dispenser

Description	Cat. No.	Each
Dispenser Base	BT-BASE	59.90

Karl Fischer Reagents, Aqualine*

Description	Quantity	Packaging	Cat. No.	Each	Case of
Aqualine Complete 1, Single-Component Reagent. Water equivalent: 1mg H_2O/mL. Pyridine free.	1L	Amber Glass	**AL1900-1**	136.26	4/454.97
	2.5L		**AL1900-212**	273.04	4/911.73
Aqualine Complete 2, Single-Component Reagent. Water equivalent: 2mg H_2O/mL. Pyridine free.	1L	Amber Glass	**AL1950-1**	89.92	4/299.68
	2.5L	Amber Glass	**AL1950-212**	187.75	4/631.27
	4L	----	**AL1950-4**	249.93	----
Aqualine Complete 5, Single-Component Reagent. Water equivalent: 5mg H_2O/mL. Pyridine free.	1L	Amber Glass	**AL2000-1**	79.43	4/264.40
	2.5L	Amber Glass	**AL2000-212**	164.03	4/571.20
	4L	----	**AL2000-4**	246.14	----
Single-component reagent. Water equivalent: 5mg H_2O/mL. For aldehyde and ketone analysis.	1L	Amber Glass	**AL2250R-1**	109.83	4/373.14
	4L	----	**AL2250-4**	472.71	----
Aqualine Matrix K. For aldehyde and ketone analysis.	1L	Amber Glass	**AL2300R-1**	81.30	4/274.90
	4L	----	**AL2300-4**	296.84	----
Aqualine Buffer. For use with acidic samples.	500mL	Amber Glass	**AL2350-500**	48.38	4/170.08
Aqualine Solvent. For two-component system. Water capacity: 8mg H_2O/mL. Pyridine free.	1L	Amber Glass	**AL2100-1**	66.90	4/229.29
	2.5L		**AL2100-212**	135.11	4/461.11
Aqualine Solvent CM. For high hydrocarbon content. Pyridine free.	1L	Amber Glass	**AL2110-1**	79.07	4/271.32
	2.5L		**AL2110-212**	155.15	4/529.93
Aqualine Titrant 5. For two-component system. Water capacity: 5mg H_2O/mL. Pyridine free.	1L	Amber Glass	**AL2200-1**	96.50	4/329.50
	2.5L		**AL2200-212**	150.73	4/514.77
Aqualine Standard 1.0. For Karl Fischer titration; 1.0mg H_2O/mL.	10 × 4mL	Amber Glass Ampule	**AL2710-40**	86.67	6/428.06
Aqualine Standard 5.0. For Karl Fischer titration; 5.0mg H_2O/mL.	500mL	Amber Glass	**AL2730-500**	49.96	4/175.72
Aqualine Standard 10.0. For Karl Fischer titration; 10.0mg H_2O/mL.	10 × 8mL	Amber Glass Ampule	**AL2720-80**	84.28	6/415.96
Aqualine Water Standard KF Oven. Standard for use in Karl Fischer oven techniques.	10g	Poly Bottle	**AL2760-10**	58.69	6/309.58
Aqualine Sodium Tartrate Dihydrate Water Standard. Solid standard for Karl Fischer titration.	100g	Poly Bottle	**AL2770-100**	47.79	6/238.84
Aqualine Water in Methanol Standard 5.0. For Karl Fischer titration; 1mL = 5.0mg H_2O.	1L	Amber Glass	**AL9000-1**	67.83	4/233.01
Aqualine Electrolyte A. Anolyte solution for general use in conventional cells with a diaphragm.	500mL	Amber Glass	**AL2500-500**	83.33	4/282.75
Aqualine Electrolyte ADG. Electrolyte solution for use in cells without a diaphragm.	500mL	Amber Glass	**AL2515-500**	83.79	4/282.85
Aqualine Electrolyte AG. Nonhalogenated anolyte solution for general use in conventional cells with a diaphragm.	500mL	Amber Glass	**AL2520-500**	85.59	4/295.90
Aqualine Electrolyte C. Catholyte solution for general use in conventional cells with a diaphragm.	25mL	Amber Glass with Septum Seal	**AL2550-25**	44.96	4/149.98
Aqualine Electrolyte CG. Nonhalogenated catholyte solution for general use in conventional cells with a diaphragm.	25mL	Amber Glass with Septum Seal	**AL2560-25**	44.96	4/153.18
Karl Fischer Reagent, Stabilized. Ready to use for moisture determination by electrometric titration. Minimum 6.0mg H_2O/mL; for lower titer, dilute with SK5 Karl Fischer Diluent.	500mL	Amber Glass	**SK3-500**	141.74	6/684.73
	1L		**SK3-1**	232.42	6/1104.41
	4L		**SK3-4**	529.92	4/1680.66
Karl Fischer Reagent Diluent. For SK3 stabilized Karl Fischer Reagent.	1L	Amber Glass	**SK5-1**	288.14	6/1378.63
	4L		**SK5-4**	606.11	4/1935.21

Liquid Scintillation Cocktails *Fisher Scientific offers eleven premium liquid scintillation cocktails that are nonflammable, nontoxic and biodegradable. They allow reduction in the amount of cocktail required for counting, while also provide high counting efficiency, outstanding quench resistance and high sample holding capacity. For ordering information and recommended usages for the high-performance PXE (Phenylxylylethane)-based cocktails—ScintiSafe* Plus 50%, ScintiSafe* 30% and ScintiSafe* Gel—or the economical LAB (Linear Alkylbenzene)-based cocktails—ScintiSafe* Econo F, ScintiSafe* Econo 1 and ScintiSafe* Econo 2, Scintirerse* I, II, BD,E and LC see Scintillaton Cocktails.*

Manganese (IV) Sulfate Monohydrate
$MnSO_4 \cdot H_2O$
F.W. 169.02
[10034-96-5]

ChemAlert® STORAGE gray

Product Specifications

Identification	To pass test
Sieve Test No 20 U.S. Std.	5% Max. retained

Meets USP Chemical Specifications

Loss on Ignition	10.0-13.0%
Substances Not Precipitated by $(NH_4)S$	≤0.5%
Organic Volatile Impurities	Meets requirements
Assay ($MnSO_4 \cdot H_2O$)	98.0-102.0%

Meets FCC Chemical Specifications

Assay ($MnSO_4 \cdot H_2O$)	98.0-102.0%
Lead (Pb)	≤4mg/kg
Loss on Heating	10.0-13.0%
Selenium	≤0.003%

Manganese Sulfate Monohydrate — Certified ACS
Crystalline

Phosporic Acid Trisodium Salt, Trisodium Phosphate

$Na_3PO_4 \cdot 12H_2O$

F.W. 380.12

This salt may lose some water of crystallization, which will result in an assay of more than 100% $Na_3PO_4 \cdot 12H_2O$.

This loss does not affect the determination of the relative amount of free alkali present.

Spill Cleanup Kit, Acid

Quantity	Packaging	Cat. No.	Each	Case of
1 kit	Carton	**18-061A**	321.26	- - - -

Neutralizes and absorbs up to 1L of glacial acetic, hydrochloric, sulfuric, phosphoric, perchloric, hydrofluoric and most other laboratory acids. Neutralizing absorbent changes from red to blue when the acid has been neutralized. "Caution—Spill" sign on back of kit warns co-workers of spill cleanup in progress.

ChemAlert® STORAGE gray

Ordering Information: Acid Spill Cleanup Kit includes two containers of neutralizing absorbent; protective gloves, goggles, apron and shoe covers; dustpan, broom and spatula; zipper-lock plastic disposal bag with write-on labels; sealing labels for used spill kit box; and step-by-step instructions.
Dimensions: 7½L × 19W × 11"H (19 × 48 × 28cm)

Spill Cleanup Kit, Caustic

Quantity	Packaging	Cat. No.	Each	Case of
1 kit	Carton	**18-061C**	350.01	- - - -

Neutralizes and absorbs up to 1L of caustic potash (potassium hydroxide, 45%); caustic soda (sodium hydroxide, 50%); aqueous ammonia (ammonium hydroxide, 28%); and weaker alkali hydroxides. Color indicator changes from blue to red when the caustic has been neutralized. "Caution—Spill" sign on back of kit warns co-workers of spill cleanup in progress.

ChemAlert® STORAGE gray

Ordering Information: Caustic Spill Cleanup Kit includes one container of absorbent; one container of neutralizer; protective gloves, goggles, apron and shoe covers; dustpan, broom and spatula; zipper-lock plastic disposal bag with write-on labels; sealing labels for used spill kit box; and step-by-step instructions.
Dimensions: 7½L × 19W × 11"H (19 × 48 × 28cm)

Spill Cleanup Kit, Flammable Solvent

Quantity	Packaging	Cat. No.	Each	Case of
1 kit	Carton	**18-061B**	350.04	- - - -

Absorbs up to four liters of flammable solvents. "Caution—Spill" sign on back of kit warns co-workers of spill cleanup in progress.

ChemAlert® STORAGE gray

Ordering Information: Solvent Spill Cleanup Kit includes two containers of absorbent; protective gloves, goggles, apron and shoe covers; dustpan, broom and spatula; zipper-lock plastic disposal bag with write-on labels; sealing labels for used spill kit box; and step-by-step instructions.
Dimensions: 7½L × 19W × 11"H (19 × 48 × 28cm).

Spill Cleanup Kits, Multisystem

Quantity	Packaging	Cat. No.	Each	Case of
3 kits	Cartons	**18-061E**	593.05	- - - -

Includes one each of Acid Spill Kit (18-061A), Caustic Spill Kit (18-061C) and Flammable Solvent Spill Kit (18-061B).

Product Specifications
Identification .... To pass test
Assay ($C_4H_{11}NO_3$) (Dried Basis) 99.0-101.0%
Heavy Metals (as Pb) .... ≤0.001%
Loss on Drying at 105°C .... ≤1.0%
Melting Range .... 168-172°C
pH of a 5% Solution at 25°C ±2°C .... 10.0 to 11.5
Organic Volatile Impurities .... Meets requirements
Residue on Ignition .... ≤0.1%

Fisher BioReagents* Material Grades

Material Grade	Definition
Analytical Grade	Designates reagents suitable for use in analytical procedures.
Certified	Reagent chemicals for which the purity standard is established by Fisher Scientific. Purity is guaranteed to meet published maximum limits of impurities.
Certified ACS	Reagent chemicals that meet or exceed the latest ACS specifications.
Certified ACS Plus	Acids that meet or exceed the latest specifications of ACS, and in addition are analyzed for more than 16 metals.
DNA Grade	Designates reagents suitable for use in Molecular Biology applications involving the manipulation of DNA. Tested for specific contaminants such as DNase and protease.
DNA Synthesis	Designates reagents suitable for use with automated DNA synthesis instrumentation.
Electrophoresis	Material used specifically for electrophoresis applications.
Genetic Analysis Grade	Material that is specially prepared for various molecular cloning applications. Tested for specific contaminants such as DNase and RNase.
HPLC	Solvents manufactured specifically for use with HPLC instruments. Meet all ACS specifications. Submicron filtered.
IEF Grade	Material suitable for use with isoelectric focusing of proteins.
Islet Isolation Grade	Material suitable for isolation of pancreatic islets.
Molecular Biology Grade	Designates reagents suitable for use in Molecular Biology applications. Teasted for specific contaminants such as nucleases and bacteria where appropriate.
Molecular Genetics	Reagent chemicals that have been specifically purified and assayed for Molecular Genetics applications.
PCR Grade	Material suitable for use in polymerase chain reaction (PCR).
Peptide Synthesis	Designates reagents suitable for use with protein synthesis instrumentation.
Protein Electrophoresis Grade	Material used specifically for protein electrophoresis applications.
Sequencing	Material designed for use with automated DNA or protein sequencing equipment.
Super Pure	Material with a purity level exceeding the various monograph grades.
Tissue Culture Grade	Material of superior quality where there are no published standards, and that are suitable for use in Tissue Culture applications.

[110-26-9 (Methylene Diacrylamide)]
Recommended storage: 4°C

Product Specifications

Conductivity at 25°C	≤10µmhos/cm
Electrophoresis	To pass test

BP1406 is made from Acrylamide and Bis-Acrylamide that meet BP170 and BP171 specifications, including being DNase-, RNase-, and Protease-free.

Acrylamide: Bis-Acrylamide 29:1 — Electrophoresis

Powder

Quantity	Packaging	Cat. No.	Each	Case of
100g	Poly Bottle	**BP1366-100**	61.43	- - - -

Application: This dry powder mix is premixed for 3.3% cross-linking and is suitable for DNA sequencing and separation of proteins.

ChemAlert® STORAGE blue

[79-06-1 (Acrylamide)]
[110-26-9 (Methylene Diacrylamide)]
Recommended storage: RT

Product Specifications

Conductivity (30% aqueous solution)	≤10µmhos/cm
Solubility (30% aqueous solution)	Clean and clear
Electrophoresis	To pass test

BP1366 is made from Acrylamide and Bis-Acrylamide that meet BP170 and BP171 specifications, including being DNase-, RNase-, and Protease-free.

Acrylamide: Bis-Acrylamide 29:1 — Electrophoresis

40% Solution

Quantity	Packaging	Cat. No.	Each	Case of
1L	Poly Bottle	**BP1408-1**	176.50	- - - -

Application: This Acrylamide Solution is premixed for 3.3% cross-linking and is suitable for DNA sequencing and separation of proteins.

ChemAlert® STORAGE blue

[79-06-1 (Acrylamide)]
[110-26-9 (Methylene Diacrylamide)]
Recommended storage: 4°C

Product Specifications

Conductivity at 25°C	≤10µmhos/cm
Electrophoresis	To pass test

BP1408 is made from Acrylamide and Bis-Acrylamide that meet BP170 and BP171 specifications, including being DNase-, RNase-, and Protease-free.

Acrylamide: Bis-Acrylamide 37.5:1 — Electrophoresis

Powder

Quantity	Packaging	Cat. No.	Each	Case of
100g	Poly Bottle	**BP1368-100**	61.43	- - - -

Application: This dry powder mix is premixed for 2.6% cross-linking and is suitable for separation of high-molecular-weight proteins.

ChemAlert® STORAGE blue

[79-06-1 (Acrylamide)]
[110-26-9 (Methylene Diacrylamide)]
Recommended storage: RT

Product Specifications

Conductivity (30% aqueous solution)	≤10µmhos/cm
Solubility (30% aqueous solution)	Clean and clear
Electrophoresis	To pass test

BP1368 is made from Acrylamide and Bis-Acrylamide that meet BP170 and BP171 specifications, including being DNase-, RNase-, and Protease-free.

Acrylamide: Bis-Acrylamide 37.5:1 — Electrophoresis

40% Solution

Quantity	Packaging	Cat. No.	Each	Case of
1L	Poly Bottle	**BP1410-1**	179.24	- - - -

Application: This Acrylamide Solution is premixed for 2.6% cross-linking and is suitable for separation of high-molecular-weight proteins.

ChemAlert® STORAGE blue

[79-06-1 (Acrylamide)]

pH	6.0 to 8.0
Water	≤5%
Chorionic Gonadotropin	10,500u/vial (80.0-125.0%)
Estrogenic Activity	Conforms
Sterility	Meets USP Requirements
Bacterial Endotoxins	≤0.03EU/unit
Diluent	Bacteriostatic Water

Agarose — Genetic Analysis Grade
Low-Melting, <1kb DNA/RNA

Quantity	Packaging	Cat. No.	Each	Case of
100g	Poly Bottle	**BP1360-100**	324.66	6/1775.58

ChemAlert® STORAGE gray

Application: Low melting temperature agarose. Certified recovery of small NA fragments. Outstanding resolution of PCR and RT-PCR fragments from 50 to 1000bp. In-gel PCR. In-gel ligations/transformations.
[9012-36-6]
Recommended storage: RT

Product Specifications

Melting Temperature	≤65°C
Gelation Temperature	<35°C
Gel Strength	$>500g/cm^2$
Sulfate Content	<0.15%
EEO (-Mr)	<0.15
Moisture Content	<10%
DNase	Not detected
RNase	Not detected

Agarose — Molecular Biology Grade
Low-Melting, Nucleic Acid Recovery

Quantity	Packaging	Cat. No.	Each	Case of
25g	Poly Bottle	**BP165-25**	154.54	6/823.00

ChemAlert® STORAGE gray

Application: Original low melting temperature agarose. NA separation from 200bp to 25kb. Preparative DNA and RNA electrophoresis. Ideally suited for DNA and RNA recovery. Cloning of tissue culture cells and viral plaque assays.
[9012-36-6]
Recommended storage: RT

Product Specifications

Melting Temperature	<65°C
Gelation Temperature	<26° to 30°C
Gel Strength	$>200g/cm^2$
Sulfate Content	<0.10%
EEO (-Mr)	<0.10
Moisture Content	<10%
DNase	Not detected
RNase	Not detected

Agarose — Genetic Analysis Grade
Broad Separation Range for DNA/RNA

Quantity	Packaging	Cat. No.	Each	Case of
100g	Poly Bottle	**BP1356-100**	200.38	6/1086.59
500g	Poly Bottle	**BP1356-500**	800.28	- - - -

ChemAlert® STORAGE gray

Application: Routine NA electrophoresis; broad resolution range 500bp to 25kb. Certified for recovery of DNA and RNA. Reliable digestion and ligation of recovered DNA or RNA fragments. Cloning.
[9012-36-6]
Recommended storage: RT

Product Specifications

Gelation Temperature	34.5° to 37.5°C
Gel Strength	$>1200g/cm^2$
Sulfate Content	<0.15%
EEO (-Mr)	<0.15

Agarose — PCR Grade
Intermediate Melting

Quantity	Packaging	Cat. No.	Each	Case of
100g	Amber Glass	**BP2410-100**	286.66	6/1575.90

Application: Separation of low MW DNA <100bp. PCR analysis applications.
[9012-36-6]
Recommended storage: RT

ChemAlert® STORAGE gray

Product Specifications

Melting Temperature	<80°C
Gelation Temperature	≤35.5°C
Gel Strength (3%)	≥1200g/cm^2
Sulfate Content	≤0.11%
EEO (-Mr)	≤0.12
DNase	Not detected
RNase	Not detected

Agarose — Protein Electrophoresis Grade
High Gelling Temperature

Quantity	Packaging	Cat. No.	Each	Case of
25g	Poly Bottle	**BP164-25**	66.30	6/355.78
100g	Poly Bottle	**BP164-100**	192.71	6/1039.22
500g	Poly Bottle	**BP164-500**	662.79	6/3615.20

Application: Crossed-IEP. Counter-immunoelectrophoresis (CIEP). Protein electrophoresis.
[9012-36-6]
Recommended storage: RT

ChemAlert® STORAGE gray

Product Specifications

Gelation Temperature	<40.5° - 43.5°C
Gel Strength	>800g/cm^2
Sulfate Content	<0.15%
EEO (-Mr)	<0.1
Moisture Content	<10%
DNase	Not detected
RNase	Not detected

Agarose — Molecular Biology Grade
Low-EEO/Multi-Purpose

Quantity	Packaging	Cat. No.	Each	Case of
100g	Poly Bottle	**BP160-100**	138.71	6/752.19
500g	Poly Bottle	**BP160-500**	456.58	6/2490.38

Application: Routine electrophoresis of DNA and RNA; wide resolution range 500bp to 23kb. High gel strength ideal for Southern and Northern blotting. PCR >1kb. Immunoprecipitation techniques. Baculovirus screening. Colony lifts.
[9012-36-6]
Recommended storage: RT

ChemAlert® STORAGE gray

Product Specifications

Gelation Temperature	34.5° - 37.5°C
Gel Strength	>1200g/cm^2
Sulfate Content	<0.15%
EEO (-Mr)	0.09 to 0.13
Moisture Content	<10%
DNase	Not detected
RNase	Not detected

Agarose — Protein Electrophoresis Grade
Medium-EEO

Quantity	Packaging	Cat. No.	Each	Case of
100g	Poly Bottle	**BP161-100**	187.92	6/1001.88

Application: Ideal alternative to polyacrylamide for serum protein electrophoresis. Immunoelectrophoresis. Electrophoresis of nucleic acids.
[9012-36-6]
Recommended storage: RT

ChemAlert® STORAGE gray

Product Specifications

Gelation Temperature	34.5° - 37.5°C
Gel Strength	>1000g/cm^2
Sulfate Content	<0.15%
EEO (-Mr)	0.16 to 0.19
Moisture Content	<10%
DNase	Not detected
RNase	Not detected

Agarose — Protein Electrophoresis Grade
High-EEO

Quantity	Packaging	Cat. No.	Each	Case of
100g	Poly Bottle	**BP162-100**	195.78	6/1054.22

Application: Immunoelectrophoresis (IEP). Crossed-IEP. Counter-immunoelectrophoresis (CIEP). Serum protein electrophoresis.
[9012-36-6]
Recommended storage: RT

AEBSF
$C_8H_{10}FNO_2S•HCl$
F.W. 239.7

ChemAlert® STORAGE **gray**

Application: 4-(2-aminoethyl)benzenesulfonyl fluoride hydrochloride is a covalent binding serine protease inhibitor. Similiar in structure to the commonly used inhibitor PMSF, AEBSF offers better solubility in water, lower toxicity, greater stability and higher inhibitory activity.
AEBSF belongs to the family of irreversible sulfonyl fluoride inhibitors that block trypsin and chymotrypsin-type enzymes.
[30827-99-7]
Recommended storage: RT, protect from light.

Product Specifications

Collagenase
Islet Isolation Grade
From Clostridium histolyticum
Yellowish Brown Lyophilized Powder

Quantity	Packaging	Cat. No.	Each	Case of
1g	Amber Glass	**BP2649-1**	453.72	7/2887.72

Clostridiopeptidase A
Application: Collagenase is most suitable for pancreatic islet isolation.
Unit Definition: One unit will liberate peptides from collagen equivalent in ninhydrin color to 3.0µmole of L-leucine in 18 hr. at pH 7.4 and 37°C.
Inhibitors: Hg^{2+}, Pb^{2+}, Cd^{2+}, Cu^{2+}, Zn^{2+}, EDTA, o-phenanthroline.
Recommended storage: 0° to 5°C, dessicate

E-Mycin, Erythrocin

$C_{37}H_{67}NO_{13}$

F.W. 733.94

Application: Erythromycin is used as an inhibitor in cell-free protein biosynthesis.

[114-07-8]

Recommended storage: RT

Product Specifications

pH of a 0.4% Solution in 5% Methanol in Water	8.0 to 10.5
IR	Conforms to standard

▸**Erythropoietin** *Available from Fisher BioReagents*, BP2518-50. Please see Fishersci.com for complete ordering information.*

Ethidium Bromide

Quantity	Packaging	Cat. No.	Each	Case of
1g	Amber Glass	**BP102-1**	31.47	6/174.35
5g	Amber Glass	**BP102-5**	116.71	6/644.06

ChemAlert® STORAGE blue

$C_{21}H_{20}N_3Br$

F.W. 394.33

Application: Used for fluorometric detection of double stranded nucleic acids. Also acts as an RNA polymerase inhibitor, and in separation of high molecular weight DNAs.

[1239-45-8]

Recommended storage: RT

Product Specifications

Solubility	To pass test
Loss on Drying at 105°C	$\leq$5%
$E^{1\%}_{1cm}$	$\geq$100L $g^{-1}cm^{-1}$
Lambda Max. (λ)	480nm ± 2nm
DNase	Not detected
RNase	Not detected
Protease	Not detected

Ethidium Bromide, 1% Solution

Molecular Biology

Guanidine Hydrochloride

Colorless-to-white Crystals

Quantity	Packaging	Cat. No.	Each	Case of
500g	Poly Bottle	**BP178-500**	145.06	6/814.09
1kg	Poly Bottle	**BP178-1**	252.92	6/1419.48

Guanidinium Chloride, Guanidine Chloride

$H_2NC(NH_2){:}NH{\bullet}HCl$, $CH_5N_3{\bullet}HCl$

F.W. 95.53

ChemAlert® STORAGE **blue**

Application: Guanidine hydrochloride is a strong protein-denaturing agent used in the isolation of RNA from cell extracts. RNase activity is inhibited in the presence of this reagent.

[50-01-1]

Recommended storage: RT

Product Specifications

Assay	≥99%
Absorbance of a 6M Solution:	
at 260nm	≤0.03
at 280nm	≤0.01
Iron	≤5ppm
Lead	≤5ppm
Arsenic	≤5ppm

Guanidine Thiocyanate

White Crystalline Powder

Quantity	Packaging	Cat. No.	Each	Case of
250g	Poly Bottle	**BP221-250**	107.43	6/596.02
1kg	Poly Bottle	**BP221-1**	378.71	6/2138.04

Guanidinium Isothiocyanate

$H_2NC({:}NH)NH_2{\bullet}HSCN$, $C_2H_6N_4S$

F.W. 118.16

ChemAlert® STORAGE **blue**

Application: A more powerful denaturing agent than guanidine hydrochloride, guanidine thiocyanate is suitable for the isolation of intact RNA from cell extracts.

[593-84-0]

Recommended storage: RT

Product Specifications

Assay	≥99.0%
IR	Conforms to standard
Melting Point	117°-122°C
Solubility (70% in H_2O at 25°C)	Clear and haze-free
A_{280nm} (70% in H_2O at 25°C)	≤0.8

Hae III

M-MLV Reverse Transcriptase

Quantity	Packaging	Cat. No.	Each	Case of
10,000 Units	Poly Tube	**BP3208-1**	61.65	- - - -
50,000 Units	Poly Tube	**BP3208-5**	218.18	- - - -

ChemAlert® STORAGE **blue**

Application: M-MLV RT can be used for first-strand synthesis of cDNA from RNA molecules.

Description: Moloney Murine Leukemia Virus Reverse Transcriptase (M-MLV RT) is an RNA-dependent DNA polymerase that can be used in cDNA synthesis with long messenger RNA templates (>5kb). M-MLV RT is the preferred reverse transcriptase for long mRNA templates because the RNase H activity of M-MLV RT is weaker than the commonly used Avian Myeloblastosis Virus (AMV) reverse transcriptase.

Concentration: 200 units/mL

Storage Buffer Components: Supplied in 20mM Tris-HCl (pH 7.5), 200mM NaCl, 0.1mM EDTA, 1mM DTT, 0.01% Nonidet* P-40 and 50% glycerol.

Provided with 5X Reaction Buffer: The 1X buffer composition is 50mM Tris-HCl (pH 8.3 at 25°C), 75mM KCl, 3mM $MgCl_2$, and 10mM DTT.

Unit Definition: One unit is defined as the amount of enzyme required to catalyze the transfer of 1nmole of deoxynucleotide into acid-precipitable material in 10 minutes at 37°C.

Note: M-MLV Reverse Transcriptase is less processive than AMV Reverse Transcriptase and therefore more units of M-MLV RT are required to generate the same amount of cDNA as in the AMV reaction.

Recommended storage: -20°C

Product Specifications

Tested for first-strand cDNA synthesis, purity by SDS-PAGE, DNase activity, RNase activity, and endonuclease/nickase activity.

Terrific	10 Pouches/Box	**BP2468-10P1**	82.22	- - - -

Four classic media, in convenient, preweighed pouches. Optimized for superior yield of bacterial culture.

- Preblended medium components save time and preparation costs
- Each pouch contains enough material for 1L of liquid media
- No more weighing of dusty powders
- High quality—assured by stringent testing procedures

*Trademark. See Trademark Reference.

ChemAlert® STORAGE gray

Application: Sodium Dodecyl Sulfate (SDS) is the most commonly used detergent in protein purification and electrophoresis. It is used as a protein denaturing agent during both extraction procedures and SDS polyacrylamide gel electrophoresis.

Filtered through a 0.2-micron filter.

[151-21-3]

Application: Taq DNA Polymerase is a recombinant enzyme that is licensed for use in PCR. Provides superior performance in routine PCR and RT-PCR. Capable of amplifying large DNA target regions (up to 10kb). Well-suited for the following PCR applications: STR, RAPD, AFLP, and SNP analyses.

Description: Taq DNA Polymerase is a thermostable enzyme of approximately 94kDa size which was isolated originally from *Thermus aquaticus*. Replicates DNA optimally at 72°C and has a half-life of 40 minutes at 95°C allowing up to 45–50 thermal cycles without appreciable loss of enzyme activity. The enzyme catalyzes the polymerization of nucleotides into double-stranded DNA in the 5'→3' direction in the presence of magnesium and it also has a 5'→3' exonuclease activity.

Source: Escherichia coli carrying a recombinant plasmid that encodes the *T. aquaticus* DNA polymerase gene.

Storage Buffer: 50mM Tris-HCl (pH 7.5), 0.1mM EDTA, 5mM DTT, added stabilizers, and 50% glycerol.

10X Buffer A: Supplied. Contains 500mM KCl, 15mM $MgCl_2$, and 100mM Tris-HCl (pH 9.0 at 25°C).

10X Buffer B: Supplied. Contains 500mM KCl and 100mM Tris-HCl (pH 9.0 at 25°C). $MgCl_2$ supplied separately.

Concentration: 5000 units/mL

Unit Definition: One unit catalyzes the incorporation of 10 nmole of total nucleotide into acid-insoluble product in 30 minutes at 70°C utilizing M13mp18 DNA as template.

Tested for: DNase and Nickase contamination and a functional test of generating a PCR amplicon from human genomic DNA using primers for the p53 gene.

2kU	Amber Glass	**BP2543-2**	100.29	5/456.31
10kU	Amber Glass	**BP2543-10**	278.53	5/1267.47
25kU	Amber Glass	**BP2543-25**	490.34	5/2316.91

ChemAlert® STORAGE gray

Application: Thrombin is used for clotting factor tests, coagulation assays, and the defibrination of blood or plasma.
[9002-04-4]
Recommended storage: Store below 0°C

Product Specifications

Description .... white to off-white powder
Activity .... ≈ 100 NIH units/mg protein

▸Transferrin *Available from Fisher BioReagents*, BP2544-1. Please see Fishersci.com for complete ordering information.*

D-(+)-Trehalose, Dihydrate

White Powder

Quantity	Packaging	Cat. No.	Each	Case of
10g	Poly Bottle	**BP2687-10**	27.78	8/205.96
25g	Poly Bag	**BP2687-25**	60.97	8/451.85
100g	Poly Bottle	**BP2687-100**	161.44	3/453.23
1kg	Poly Bottle	**BP2687-1**	702.52	6/3870.05

$C_{12}H_{22}O_{11}•2H_2O$
F.W. 378.3

ChemAlert® STORAGE gray

Application: D-(+)-Trehalose is used in several biochemical techniques.
[6138-23-4]
Recommended storage: RT

Product Specifications

Assay .... ≥98%
FTIR .... Conforms to standard
Loss on Drying 8.5-10.5%

Trichloroacetic Acid

Flakes or Crystals

Quantity	Packaging	Cat. No.	Each	Case of
250g	Amber Glass	**BP555-250**	54.91	6/265.34
500g	Amber Glass	**BP555-500**	92.92	6/451.98
1kg	Poly Bottle	**BP555-1**	102.07	4/321.36

Trichlorethanoic Acid
TCA
CCl_3COOH
$C_2HCl_3O_2$
F.W. 163.36

ChemAlert® STORAGE white

Application: TCA is used to precipitate proteins and nucleic acids from solution.
[76-03-9]
Recommended storage: RT

Product Specifications

Assay .... ≥99.0%
Chloride .... ≤0.002%
Heavy Metals (as Pb) .... ≤0.002%
Iron .... ≤0.001%
Nitrate .... ≤0.002%
Phosphate .... ≤5ppm
Residue after Ignition 0.030%
Substances Darkened by Sulfuric Acid .... To pass test
Sulfate .... ≤0.02%

Tricine
White Crystals

Quantity	Packaging	Cat. No.	Each	Case of
100g	Poly Bottle	**BP315-100**	50.52	6/279.31

N-[Tris-(hydroxymethyl)methyl]glycine

$(HOCH_2)_3CNHCH_2CO_2H$

$C_6H_{13}NO_5$

F.W. 179.2

ChemAlert® STORAGE gray

Application: This biological buffer has a usable pH range of 7.4 to 8.8.

[5704-04-1]

Recommended storage: RT

Product Specifications

Assay	≥98%
pK_a at 25°C	8.10 ± 0.2
Melting Point	184° ± 2°C

Tris–Glycine, 10X — Electrophoresis

Powder

Quantity	Packaging	Cat. No.	Each	Case of
1	Foil Pack	**BP1307-1**	59.23	- - - -

ChemAlert® STORAGE gray

Application: Tris–Glycine is commonly used as a buffer in native polyacrylamide gel electrophoresis.
Each pack contains preweighed powder to make 1L of a 10X solution (0.25M Tris Base and 1.92M Glycine).
[77-86-1 (Tris Base)]
[56-40-6 (Glycine)]
Recommended storage: RT

Product Specifications

pH (1X solution) at 25°C	8.4 ± 0.1
DNase	Not detected
RNase	Not detected

Polysorbate 20, Polyoxyethylene-20-sorbitan Monolaurate
$C_{58}H_{114}O_{26}$
F.W. 1227.54

ChemAlert® STORAGE **gray**

Application: This nonionic detergent is used in the isolation of water-soluble membrane proteins.
[9005-64-5]
Recommended storage: RT

Product Specifications

Hydroxyl Number	96 to 108
Water	≤3.0%
Residue after Ignition	≤0.25%
Arsenic	≤0.0003%
Lead	≤0.0005%
Copper	≤0.0005%

Tween* 80

Quantity	Packaging	Cat. No.	Each	Case of
500mL	Amber Glass	**BP338-500**	26.93	6/149.19

Polysorbate 80, Polyoxyethylene-20-sorbitan Monooleate
$C_{64}H_{124}O_{26}$
F.W. 1309.68

ChemAlert® STORAGE **gray**

Application: This nonionic detergent is used in the isolation of water-soluble membrane proteins.
[9005-65-6]
Recommended storage: RT

Product Specifications

Hydroxyl Number	65 to 80
Water	≤3.0%
Residue after Ignition	≤0.25%
Arsenic	≤0.0001%
Lead	≤0.0005%
Copper	≤0.0005%

L-Tyrosine
White Crystals or Crystalline Powder

Quantity	Packaging	Cat. No.	Each	Case of
100g	Amber Glass	**BP396-100**	41.96	6/239.51

$C_9H_{11}NO_3$
F.W. 181.19

ChemAlert® STORAGE **gray**

Application: This amino acid is suitable for use in tissue culture systems requiring additives.
[60-18-4]
Recommended storage: RT

Product Specifications

Assay	98.5-100.5%
Specific Rotation $[\alpha]_D^{20}$ (c=5, 1N HCl)	-11.3° to -12.1°
State of Solution	≥95.0% transmittance
Ammonium	≤0.02%
Heavy Metals (as Pb)	≤10ppm
Arsenic	≤1ppm
Other Amino Acids	Chromatographically not detectable
Loss on Drying	≤0.20%
Residue on Ignition (sulfated)	≤0.10%

Urea **Molecular Biology**
Colorless-to-white Crystals or Crystalline Powder

Quantity	Packaging	Cat. No.	Each	Case of
500g	Poly Bottle	**BP169-500**	47.22	6/260.87
2.5kg	Poly Bottle	**BP169-212**	128.87	4/479.41
10kg	Poly Pail	**BP169-10**	421.38	- - - -

NH_2CONH_2
CH_4N_2O
F.W. 60.06

ChemAlert® STORAGE **gray**

Application: Urea is used as a denaturing agent for DNA and proteins.
[57-13-6]
Recommended storage: RT

Product Specifications

Assay	≥99.0%
Absorbance of a 5M Solution at 280nm	≤0.05
Melting Point	132°-135°C
CNO	≤5ppm
Biuret Test	Negative
Copper	≤1ppm
Iron	≤2ppm
Heavy Metals (as Pb)	≤5ppm
Solubility of an 8M Solution	To pass test
DNase	Not detected
RNase	Not detected
Protease	Not detected

Water, Sterile — Biotech Grade

Quantity	Packaging	Cat. No.	Each	Case of
4L	PolyPac*	**BP2485-4**	43.56	- - - -
20L	PolyPac	**BP2485-20**	140.93	- - - -

H_2O

F.W. 18.02

ChemAlert® STORAGE gray

Application: Biotech-grade water can be used for several biological test procedures.

Filtered through a 0.2 micron filter.

[7732-18-5]

Product Specifications

Specific Conductance at 25°C	≤2×10^{-6} ohm^{-1} cm^{-1}
pH at 25°C	5.4–7.0
Heavy Metals (as Pb)	≤0.01ppm
Substances Reducing Permanganate	To pass test

Water, Sterile — DNA Grade

For DNA Work

Quantity	Packaging	Cat. No.	Each	Case of
1L	Poly Bottle	**BP2470-1**	34.00	6/180.88

H_2O

F.W. 18.02

ChemAlert® STORAGE gray

Application: DNA-grade Water is DNase- and Protease-free and is suitable for all DNA work.

Filtered through a 0.2 micron filter and autoclaved.

[7732-18-5]

Product Specifications

pH at 25°C	5.4–7.0
DNase	Not detected
Protease	Not detected

Water, Sterile — Molecular Biology

For RNA work, DEPC-treated and Nuclease-free

Quantity	Packaging	Cat. No.	Each	Case of
1L	Poly Bottle	**BP561-1**	37.11	6/197.56

H_2O

F.W. 18.02

ChemAlert® STORAGE gray

Application: Diethylpyrocarbonate (DEPC)-treated Water is guaranteed nuclease-free (tested for both DNase and RNase) and is suitable for all RNA work.

DEPC-treated and autoclaved.

Filtered through a 0.2 micron filter.

[7732-18-5]

Product Specifications

Specific Conductance at 25°C	≤18×10^{-6} ohm^{-1} cm^{-1}
DNase	Not detected
RNase	Not detected
Protease	Not detected

Water, Sterile — Sterile

Nuclease Free

Quantity	Packaging	Cat. No.	Each	Case of
50mL	Poly Bottle	**BP2484-50**	24.57	6/114.69
100mL	Poly Bottle	**BP2484-100**	36.67	6/171.19

H_2O

F.W. 18.02

ChemAlert® STORAGE gray

Application: Diethylpyrocarbonate (DEPC)-treated Water is guaranteed nuclease-free (tested for both DNase and RNase) and is suitable for all RNA work.

Filtered through a 0.2 micron filter.

Xba I

Source: Xanthomonas badrii

Quantity	Packaging	Cat. No.	Each	Case of
10,000 units	Poly Tube	**BP3448-5**	244.88	- - - -

ChemAlert® STORAGE gray

Application: *Xba* I restriction endonuclease digests dsDNA with sequence indicated below.

T'CTAG A
A GATC'T

Concentration: 8-12 units/µL

High Concentration (HC): 40-80 units/µL

Isoschizomers: None

Heat Inactivated: -

Storage Buffer Components: 10mM Tris-HCl (pH 7.4), 300mM NaCl, 0.1mM EDTA, 1mM DTT, 0.5mg/mL BSA and 50% glycerol.

Qualified for Blue/White Cloning Assays and genomic assays.

Recommended storage: -20°C

Product Specifications

Percent Activity in Quad 4* Buffer System:

A	50–75%
B	75–100%
C	75–100%
D	100%
UNIVERSAL*	100%

Frequency of Cutting:

λ	1
Ad-2	5
ΦX174	0
pUC18	1
M13mp18	1
pBR322	0

Xho I

Source: Xanthomonas holcicola

Quantity	Packaging	Cat. No.	Each	Case of
10,000 units	Poly Tube	**BP3450-5**	154.74	- - - -

ChemAlert® STORAGE gray

Application: *Xho* I restriction endonuclease digests dsDNA with sequence indicated below.

C'TCGA G
G AGCT'C

Concentration: 10 units/µL

Isoschizomers: *Sfr*274 I, *Pae*R7 I

Heat Inactivated: +

Storage Buffer Components: 10mM Tris-HCl (pH 7.4), 300mM KCl, 0.01% Triton* X-100, 0.1mM EDTA, 1mM DTT, 0.5mg/mL BSA and 50% glycerol.

Qualified for Blue/White Cloning Assays and genomic assays.

Recommended storage: -20°C

Product Specifications

Percent Activity in Quad 4* Buffer System:

A	25–50%
B	75–100%
C	75–100%
D	100%
UNIVERSAL*	10–25%

Standards, Inorganic

The following pages are a representative listing of Inorganic Standards available from Fisher Chemical*, SPEX CertiPrep*, Restek* and Ultra Scientific. Throughout this section, you'll find certified standards designed especially for use in Atomic Absorption (AA), AA/ICP-AES, Contract Laboratory Program (CLP), ICP-MS/ICP-AES, Ion Chromatography, Quality Control Testing, and Proficiency Testing. Included with each entry are applicable EPA method protocols, a listing of individual components, and relevant concentration levels.

Atomic Absorption

Aluminum, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SA442-100**	34.91	6/162.84
500mL	Poly Bottle	**SA442-500**	93.09	6/435.25

For Atomic Absorption.
(1mL = 1mg Al)
Solute: Aluminum Chloride Hexahydrate
Solvent: Dilute Hydrochloric Acid
[7784-13-6 (Aluminum Chloride Hexahydrate)]
[7647-01-0 (Hydrogen Chloride)]

ChemAlert® STORAGE white

Product Specifications
Actual Lot Analysis is reported on label.
Concentration (by Wet Method) ....≥990ppm and ≤1010ppm Al

Arsenic, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SA449-100**	33.27	6/159.77
500mL	Poly Bottle	**SA449-500**	90.91	6/430.58

For Atomic Absorption.
(1mL = 1mg As)
Solute: Arsenic Trioxide
Solvent: Dilute Nitric Acid

ChemAlert® STORAGE white

Product Specifications
Concentration ....≥990 and ≤1010ppm As

Boron, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SB155-100**	33.28	6/159.85
500mL	Poly Bottle	**SB155-500**	89.09	6/417.96

For Atomic Absorption.
(1mL = 1mg B)
Solute: Boric Acid
Solvent: Distilled Water
[10043-35 (Boric Acid)]

ChemAlert® STORAGE gray

Product Specifications
Concentration ....≥990 and ≤1010ppm B

Cadmium, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SC118-100**	30.64	6/147.14
500mL	Poly Bottle	**SC118-500**	84.18	6/398.55

For Atomic Absorption.
(1mL = 1mg Cd)
Solute: Cadmium Metal
Solvent: Dilute Nitric Acid
[7440-43-9 (Cadmium)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE white

Product Specifications
Concentration (Wet Method) ....≥990 and ≤1010ppm Cd

Calcium, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SC191-100**	33.28	6/159.85
500mL	Poly Bottle	**SC191-500**	98.74	6/470.77

For Atomic Absorption.
(1mL = 1mg Ca)
Solute: Calcium Carbonate
Solvent: Dilute Nitric Acid
[471-34-1 (Calcium Carbonate)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE white

Product Specifications
Concentration (Wet Method) ....≥990 and ≤1010ppm Ca

Chromium, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SC192-100**	33.28	6/159.85
500mL	Poly Bottle	**SC192-500**	90.77	6/429.89

For Atomic Absorption.
(1mL = 1mg Cr)
Solute: Potassium Dichromate
Solvent: Distilled Water
[7778-50-9 (Potassium Dichromate)]

ChemAlert® STORAGE gray

Product Specifications
Actual Lot Analysis is reported on label.
Concentration ....≥990 and ≤1010ppm Cr

Cobalt, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SC193-100**	32.90	6/157.99
500mL	Poly Bottle	**SC193-500**	90.97	6/428.79

For Atomic Absorption.
(1mL = 1mg Co)
Solute: Cobalt Nitrate
Solvent: Dilute Nitric Acid
[10026-22-9 (Cobaltous Nitrate)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE white

*Trademark. See Trademark Reference.

Product Specifications

Concentration (Wet Method) ....≥990 and ≤1010ppm Co

Copper, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SC194-100**	35.04	6/163.50
500mL	Poly Bottle	**SC194-500**	95.67	6/447.39

For Atomic Absorption.
(1mL = 1mg Cu)
Solute: Copper Nitrate
Solvent: Dilute Nitric Acid
[19004-19-4 (Cupric Nitrate)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE **white**

Product Specifications

Concentration (Wet Method) ....≥990 and ≤1010ppm Cu

Gold, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Amber Glass	**SG91-100**	104.23	6/485.61

For Atomic Absorption.
(1mL = 1mg Au)
Solute: Gold Chloride
Solvent: Distilled Water
[16961-25-4 (Gold Chloride)]

ChemAlert® STORAGE **gray**

Product Specifications

Concentration ....≥990 and ≤1010ppm Au

Iron, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SI124-100**	35.22	6/164.35
500mL	Poly Bottle	**SI124-500**	88.19	6/412.32

For Atomic Absorption.
(1mL = 1mg Fe)
Solute: Ferric Nitrate
Solvent: Dilute Nitric Acid
[7782-61-8 (Ferric Nitrate)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE **white**

Product Specifications

Concentration (Wet Method)......................................≥990 and ≤1010ppm Fe

Lead, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SL21-100**	39.95	6/186.52
500mL	Poly Bottle	**SL21-500**	95.60	6/447.02

For Atomic Absorption.
(1mL = 1mg Pb)
Solute: Lead Metal
Solvent: Dilute Nitric Acid

ChemAlert® STORAGE **white**

Product Specifications

Concentration (Wet Method) ....≥990ppm and ≤1010ppm Pb

Magnesium, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SM51-100**	33.28	6/159.85
500mL	Poly Bottle	**SM51-500**	90.97	6/430.93

For Atomic Absorption.
(1mL = 1mg Mg)
Solute: Magnesium Metal
Solvent: Dilute Nitric Acid
[13446-18-9 (Magnesium Dinitrate Hexahydrate)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE **white**

Product Specifications

Concentration (Wet Method) ....≥990ppm and ≤1010ppm Mg

Manganese, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SM81-100**	33.28	6/159.85
500mL	Poly Bottle	**SM81-500**	90.97	6/430.93

For Atomic Absorption.
(1mL = 1mg Mn)
Solute: Manganese Nitrate Hexahydrate
Solvent: Dilute Nitric Acid
[17141-63-8 (Manganese Nitrate Hexahydrate)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE **white**

Product Specifications

Concentration (Wet Method) ....≥990ppm and ≤1010ppm Mn

Mercury, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SM114-100**	33.28	6/159.85
500mL	Poly Bottle	**SM114-500**	90.97	6/428.79

For Atomic Absorption.
(1mL = 1mg Hg)
Solute: Mercuric Nitrate
Solvent: Dilute Nitric Acid
[7783-34-8 (Mercury (II) Nitrate Monohydrate)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE **white**

Hg

Product Specifications

Concentration (Wet Method)..............................≥990ppm and ≤1010ppm Hg

Molybdenum, Reference Standard Solution — Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SM113-100**	33.28	6/159.85
500mL	Poly Bottle	**SM113-500**	92.14	6/437.08

For Atomic Absorption.
(1mL = 1mg Mo)
Solute: Molybdenum Metal
Solvent: Dilute Aqua Regia
[1313-27-5 (Molybdenum Trioxide)]
[7647-01-0 (Hydrogen Chloride)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE **white**

Product Specifications

Concentration (Wet Method) ....≥990ppm and ≤1010ppm Mo

Nickel, Reference Standard Solution

Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SN70-100**	35.22	6/164.35
500mL	Poly Bottle	**SN70-500**	88.52	6/413.76

For Atomic Absorption.
(1mL = 1mg Ni)
Solute: Nickel Nitrate
Solvent: Dilute Nitric Acid
[13478-00-7 (Nickel (II) Nitrate, Hexahydrate)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE white

Product Specifications
Concentration (Wet Method) ....≥990ppm and ≤1010ppm Ni

Potassium, Reference Standard Solution

Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SP351-100**	33.28	6/159.85
500mL	Poly Bottle	**SP351-500**	90.97	6/430.93

For Atomic Absorption.
(1mL = 1mg K)
Solute: Potassium Chloride
Solvent: Distilled Water
[7447-40-7 (Potassium Chloride)]

ChemAlert® STORAGE gray

Product Specifications
Concentration (Wet Method) ....≥990ppm and ≤1010ppm K

Selenium, Reference Standard Solution

Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SS464-100**	33.27	6/159.77
500mL	Poly Bottle	**SS464-500**	90.91	6/428.43

For Atomic Absorption.
(1mL = 1mg Se)
Solute: Selenium Dioxide
Solvent: Distilled Water
[7783-00-8 (Selenium Dioxide)]

ChemAlert® STORAGE gray

Product Specifications
Concentration ....≥990 and ≤1010ppm Se

Silicon, Reference Standard Solution

Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SS465-100**	33.27	6/159.77
500mL	Poly Bottle	**SS465-500**	90.91	6/430.58

For Atomic Absorption.
(1mL = 1mg Si)
Solute: Sodium Silicate
Solvent: Distilled Water
[6834-92-0 (Sodium Metasilicate)]

ChemAlert® STORAGE gray

Product Specifications
Concentration ....≥990ppm and ≤1010ppm Si

Silver, Reference Standard Solution

Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Amber Glass	**SS457-100**	36.85	6/171.97
500mL	Amber Glass	**SS457-500**	100.85	6/467.44

For Atomic Absorption.
(1mL = 1mg Ag)
Solute: Silver Nitrate
Solvent: Dilute Nitric Acid
[7761-88-8 (Silver Nitrate)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE white

Product Specifications
Concentration (Wet Method) ....≥990ppm and ≤1010ppm Ag

Sodium, Reference Standard Solution

Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SS139-100**	33.28	6/159.85
500mL	Poly Bottle	**SS139-500**	90.03	6/426.49

For Atomic Absorption.
(1mL = 1mg Na)
Solute: Sodium Chloride
Solvent: Distilled Water
[7647-14-5 (Sodium Chloride)]

ChemAlert® STORAGE white

Product Specifications
Concentration (Wet Method) ....≥990ppm and ≤1010ppm Na

Tin, Reference Standard Solution

Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**ST97-100**	33.27	6/159.77
500mL	Poly Bottle	**ST97-500**	98.66	6/468.10

For Atomic Absorption.
(1mL = 1mg Sn)
Solute: Tin Metal
Solvent: Dilute Hydrochloric Acid
[7440-31-5 (Tin)]
[7647-01-0 (Hydrogen Chloride)]

ChemAlert® STORAGE white

Product Specifications
Concentration (Wet Method) ....≥990ppm and ≤1010ppm Sn

Zinc, Reference Standard Solution

Certified

1000ppm ± 1%

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**SZ13-100**	35.04	6/163.50
500mL	Poly Bottle	**SZ13-500**	95.67	6/447.39

For Atomic Absorption.
(1mL = 1mg Zn)
Solute: Zinc Oxide
Solvent: Dilute Nitric Acid
[1314-13-2 (Zinc Oxide)]
[7697-37-2 (Nitric Acid)]

ChemAlert® STORAGE white

Product Specifications
Concentration (Wet Method) ....≥990ppm and ≤1010ppm Zn

AA/ICP-AES Single Elements

Aluminum Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLAL2-2Y**	55.28	- - - -
250mL	Poly Bottle	**PLAL2-2T**	90.62	- - - -
500mL	Poly Bottle	**PLAL2-2X**	100.02	- - - -
125mL	Poly Bottle	**PLAL2-3Y**	81.64	- - - -
500mL	Poly Bottle	**PLAL2-3X**	158.23	- - - -
500mL	Poly Bottle	**PLAL1-2X**	104.47	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
2-5% HNO_3	1000µg/mL	PLAL2-2Y, -2T, -2X
	10,000µg/mL	PLAL2-3Y, -3X
2-5% HCl	1000µg/mL	PLAL1-2X

Arsenic Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLAS2-2Y**	55.28	- - - -
250mL	Poly Bottle	**PLAS2-2T**	90.62	- - - -
500mL	Poly Bottle	**PLAS2-2X**	100.02	- - - -
125mL	Poly Bottle	**PLAS2-3Y**	81.64	- - - -
500mL	Poly Bottle	**PLAS2-3X**	158.23	- - - -
500mL	Poly Bottle	**PLAS1-2X**	104.47	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
2-5% HNO_3	1000µg/mL	PLAS2-2Y, -2T, -2X
	10,000µg/mL	PLAS2-3Y, -3X
2-5% HCl	1000µg/mL	PLAS1-2X

Barium Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLBA2-2Y**	55.28	- - - -
250mL	Poly Bottle	**PLBA2-2T**	90.62	- - - -
500mL	Poly Bottle	**PLBA2-2X**	100.02	- - - -
125mL	Poly Bottle	**PLBA2-3Y**	81.64	- - - -
500mL	Poly Bottle	**PLBA2-3X**	158.23	- - - -
500mL	Poly Bottle	**PLBA1-2X**	104.47	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
2-5% HNO_3	1000µg/mL	PLBA2-2Y, -2T, -2X
	10,000µg/mL	PLBA2-3Y, -3X
2-5% HCl	1000µg/mL	PLBA1-2X

Beryllium Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLBE2-2Y**	55.28	- - - -
500mL	Poly Bottle	**PLBE2-2X**	100.02	- - - -
125mL	Poly Bottle	**PLBE2-3Y**	81.64	- - - -
500mL	Poly Bottle	**PLBE2-3X**	158.23	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
2-5% HNO_3	1000µg/mL	PLBE2-2Y, -2X
	10,000µg/mL	PLBE2-3Y, -3X

Boron Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLB9-2Y**	55.28	- - - -
250mL	Poly Bottle	**PLB9-2T**	90.62	- - - -
500mL	Poly Bottle	**PLB9-2X**	100.02	- - - -
125mL	Poly Bottle	**PLB9-3Y**	81.64	- - - -
500mL	Poly Bottle	**PLB9-3X**	158.23	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
H_2O	1000µg/mL	PLB9-2Y, -2T, -2X
	10,000µg/mL	PLB9-3Y, -3X

Cadmium Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLCD2-2Y**	55.28	- - - -
250mL	Poly Bottle	**PLCD2-2T**	90.62	- - - -
500mL	Poly Bottle	**PLCD2-2X**	100.02	- - - -
125mL	Poly Bottle	**PLCD2-3Y**	81.64	- - - -
500mL	Poly Bottle	**PLCD2-3X**	158.23	- - - -
500mL	Poly Bottle	**PLCD1-2X**	104.47	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
2-5% HNO_3	1000µg/mL	PLCD2-2Y, -2T, -2X
	10,000µg/mL	PLCD2-3Y, -3X
2-5% HCl	1000µg/mL	PLCD1-2X

Calcium Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of

125mL	Poly Bottle	**PLP9-2Y**	55.28	- - - -
250mL	Poly Bottle	**PLP9-2T**	90.62	- - - -
500mL	Poly Bottle	**PLP9-2X**	100.02	- - - -
125mL	Poly Bottle	**PLP9-3Y**	81.64	- - - -
500mL	Poly Bottle	**PLP9-3X**	158.23	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
H$_2$0	1000µg/mL	PLP9-2Y, -2T, -2X
	10,000µg/mL	PLP9-3Y, -3X

Platinum Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLPT3-2Y**	94.25	- - - -
500mL	Poly Bottle	**PLPT3-2X**	208.38	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
10% HCl	1000µg/mL	PLPT3-2Y, -2X

Potassium Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLK2-2Y**	55.28	- - - -
250mL	Poly Bottle	**PLK2-2T**	90.62	- - - -
500mL	Poly Bottle	**PLK2-2X**	100.02	- - - -
125mL	Poly Bottle	**PLK2-3Y**	81.64	- - - -
500mL	Poly Bottle	**PLK2-3X**	158.23	- - - -
500mL	Poly Bottle	**PLK1-2X**	104.47	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
2-5% HNO$_3$	1000µg/mL	PLK2-2Y, -2T, -2X
	10,000µg/mL	PLK2-3Y, -3X
2-5% HCl	1000µg/mL	PLK1-2X

Rhenium Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLRE9-2Y**	94.25	- - - -
500mL	Poly Bottle	**PLRE9-2X**	208.38	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
H$_2$0	1000µg/mL	PLRE9-2Y, -2X

Rhodium Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLRH3-2Y**	359.00	- - - -
500mL	Poly Bottle	**PLRH3-2X**	641.70	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
10% HCl	1000µg/mL	PLRH3-2Y, -2X

Scandium Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLSC2-2Y**	94.25	- - - -
500mL	Poly Bottle	**PLSC2-2X**	208.38	- - - -
125mL	Poly Bottle	**PLSC2-3Y**	164.49	- - - -
500mL	Poly Bottle	**PLSC2-3X**	347.76	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
2-5% HNO$_3$	1000µg/mL	PLSC2-2Y, -2X
	10,000µg/mL	PLSC2-3Y, -3X

Selenium Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**PLSE2-2Y**	55.28	- - - -
250mL	Poly Bottle	**PLSE2-2T**	90.62	- - - -
500mL	Poly Bottle	**PLSE2-2X**	100.02	- - - -
125mL	Poly Bottle	**PLSE2-3Y**	81.64	- - - -
500mL	Poly Bottle	**PLSE2-3X**	158.23	- - - -

Assurance* Certificate of Analysis reports up to 39 elements at ppb levels.

Product Specifications

Matrix	Concentration	Cat. No.
2-5% HNO$_3$	1000µg/mL	PLSE2-2Y, -2T, -2X
	10,000µg/mL	PLSE2-3Y, -3X

Silver Standard — Plasma Grade

SPEX CertiPrep

Quantity	Packaging	Cat. No.	Each	Case of

Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLCA2-2Y**	72.15	- - - -

Contents at 1000µg/mL in 2% HNO$_3$.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Chromium Standard

Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLCR2-2Y**	72.15	- - - -

Contents at 1000µg/mL in 2% HNO$_3$.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Copper Standard

Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLCU2-2Y**	72.15	- - - -

Contents at 1000µg/mL in 2% HNO$_3$.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Gold Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLAU1-1Y**	93.77	- - - -

Contents at 100µg/mL in 2% HCl.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Iron Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLFE2-2Y**	72.15	- - - -

Contents at 1000µg/mL in 2% HNO_3.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Lead Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLPB2-2Y**	72.15	- - - -

Contents at 1000µg/mL in 2% HNO_3.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Manganese Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLMN2-2Y**	72.15	- - - -

Contents at 1000µg/mL in 2% HNO_3.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Mercury Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLHG4-2Y**	72.15	- - - -
125mL	Poly Bottle	**CLHG2-1AY**	68.45	- - - -

Contents at 1000µg/mL in 10% HNO_3 for CLHG4-2Y.
Contents at 10µg/mL in 5% HNO_3 for CLHG2-1AY.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Molybdenum Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLMO9-2Y**	72.15	- - - -

Contents at 1000µg/mL in H_2O.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Potassium Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLK2-2Y**	72.15	- - - -

Contents at 1000µg/mL in 2% HNO_3.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Rhodium Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLRH1-1AY**	254.07	- - - -

Internal Standard Solution.
Contents at 10µg/mL in 2% HCl.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Sodium Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLNA2-2Y**	72.15	- - - -

Contents at 1000µg/mL in 2% HNO_3.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Tin Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
100mL	Poly Bottle	**CLSN2-2Y**	99.38	- - - -

Contents at 1000µg/mL in 1% HNO_3/1% HF.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

Zinc Standard
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLZN2-2Y**	72.15	- - - -

Contents at 1000µg/mL in 2% HNO_3.
Claritas PPT* Certificate of Analysis reports up to 68 elements at ppt levels.

ICP-MS/ICP-AES, Multi-Element

▸*Internal Standard Stock Solutions* *see CLISS-1.*

ICP-MS Calibration Standard 1
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLMS-1**	214.33	- - - -

Each component at 10µg/mL in 5% HNO_3:

- Cerium
- Dysprosium
- Erbium
- Europium
- Gadolinium
- Holmium
- Lanthanum
- Lutetium
- Neodymium
- Praseodymium
- Samarium
- Scandium
- Terbium
- Thorium
- Thulium
- Ytterbium
- Yttrium

ICP-MS Calibration Standard 2
Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLMS-23**	30.26	- - - -
125mL	Poly Bottle	**CLMS-2N**	65.79	- - - -

CLMS-2N does not contain mercury.

Each component at 10µg/mL in 5% HNO_3:

- Aluminum
- Arsenic
- Barium
- Beryllium
- Bismuth
- Cadmium
- Calcium
- Cesium
- Chromium
- Cobalt
- Copper
- Gallium
- Indium
- Iron
- Lead
- Lithium
- Magnesium
- Manganese
- Mercury†
- Nickel
- Potassium
- Rubidium
- Selenium
- Silver
- Sodium
- Strontium
- Thallium
- Uranium
- Vanadium
- Zinc

† Supplied separately.

ICP-MS Calibration Standard 2A — Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLMS-2A**	317.17	- - - -
125mL	Poly Bottle	**CLMS-2AN**	254.76	- - - -

CLMS-2AN does not contain mercury.

Each component at 10µg/mL in 5% HNO_3:

Aluminum
Arsenic
Barium
Beryllium
Cadmium
Calcium
Cesium
Chromium
Cobalt
Copper
Gallium
Iron
Mercury†
Potassium
Lead
Lithium
Magnesium
Manganese
Nickel
Rubidium
Selenium
Silver
Sodium
Strontium
Thallium
Uranium
Vanadium
Zinc

† Supplied separately.

ICP-MS Calibration Standard 3 — Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLMS-3**	156.16	- - - -

Each component at 10µg/mL in 10% HCl/1% HNO_3:

Antimony
Gold
Hafnium
Iridium
Palladium
Platinum
Rhodium
Ruthenium
Tellurium
Tin

ICP-MS Calibration Standard 4 — Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLMS-4**	187.80	- - - -

Each component at 10µg/mL in H_2O/tr. HF:

Boron
Germanium
Molybdenum
Niobium
Phosphorus
Rhenium
Silicon
Sulfur
Tantalum
Titanium
Tungsten
Zirconium

ICP-MS Calibration Standard 5 — Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLMS-5**	129.88	- - - -

Each component at 10µg/mL in 2% HNO_3:

Beryllium
Bismuth
Cerium
Cobalt
Indium
Lead
Magnesium
Nickel
Uranium

ICP-MS Calibration Standards — Trace ICP/ICP-MS Grade

Set of 7

Quantity	Packaging	Cat. No.	Each	Case of
7 × 125mL	Poly Bottles	**CLMS-SET**	832.00	- - - -

Set includes one 100mL bottle each of:

CLMS-1
CLMS-2
CLMS-3
CLMS-4
CLBLK-HNO_3
CLBLK-HCL
CLBLK-H_2O

ICP-MS/ICP, Instrument Modification Blanks

Instrument Calibration Standard 1 — Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CL-CAL-1**	299.03	- - - -

Each component at 20µg/mL in 2% HNO_3/tr. Tartaric Acid:

Aluminum
Antimony
Arsenic
Barium
Beryllium
Cadmium
Chromium
Cobalt
Copper
Lead
Manganese
Molybdenum
Nickel
Selenium
Silver
Thallium
Thorium
Uranium
Vanadium
Zinc

Instrument Calibration Standard 2 — Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CL-CAL-2**	321.80	- - - -

Each component at 100µg/mL in 5% HNO_3/tr. Tartaric Acid/tr. HF:

Aluminum
Antimony
Arsenic
Barium
Beryllium
Cadmium
Calcium
Chromium
Cobalt
Copper
Iron
Lead
Magnesium
Manganese
Molybdenum
Nickel
Potassium
Selenium
Silver
Sodium
Strontium
Thallium
Tin
Titanium
Vanadium
Zinc

Instrument Check Standard 1 — Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CL-ICS-1**	263.80	- - - -

With Certificate of Analysis.

Each component at 10µg/mL in 2% HNO_3/tr. Tartaric Acid:

Aluminum
Antimony
Arsenic
Barium
Beryllium
Cadmium
Chromium
Cobalt
Copper
Lead
Manganese
Nickel
Selenium
Silver
Thallium
Vanadium
Zinc

Instrument Check Standard 3 — Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CL-ICS-3**	144.55	- - - -

Each component at 200µg/mL in 2% HNO_3:

Calcium
Iron
Magnesium
Potassium
Sodium

Interference Check Standard 1 Trace ICP/ICP-MS Grade

For SW-846

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CL-INT-A23**	17.17	- - - -

Components in 5% HNO_3/tr. HF:

Al	1000µg/mL
Ca	1000µg/mL
C	2000µg/mL
Cl	10,000µg/mL
Fe	1000µg/mL
Mg	1000µg/mL
Mo	20µg/mL
P	1000µg/mL
K	1000µg/mL
Na	1000µg/mL
S	1000µg/mL
Ti	20µg/mL

▸***Internal Standards for Single Elements*** *begin on p. 2281.*

Internal Standard Stock Solution Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CLISS-1**	144.55	- - - -

May be used to monitor and correct changes that occur from differences between standards and samples.

Each component at 10µg/mL in 2% HNO_3:

Bismuth
Holmium
Indium
Lithium
Scandium
Terbium
Yttrium

Quality Control Standard 21 Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CL-QC-21**	316.16	- - - -

Used to check the standard curve, the procedure for interelement correction, and other spectral interferences.

Each component at 100µg/mL in 5% HNO_3/tr Tartaric Acid/tr HF:

Antimony
Arsenic
Beryllium
Cadmium
Calcium
Chromium
Cobalt
Copper
Iron
Lead
Lithium
Magnesium
Manganese
Molybdenum
Nickel
Selenium
Strontium
Thallium
Titanium
Vanadium
Zinc

Tuning Solution Trace ICP/ICP-MS Grade

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**CL-TUNE-1**	233.72	- - - -

Each component at 10µg/mL in 2% HNO_3/5% HCl:

Barium
Beryllium
Cerium
Cobalt
Indium
Lead
Lithium
Magnesium
Rhodium
Thallium
Uranium
Yttrium

Ion Chromatography, Single Element

Ion Chromatography Ammonia Nitrogen Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-NH3N9-2Y**	53.35	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Ammonia Nitrogen anion at 1000µg/mL in aqueous solution of NH_4Cl.
With Certificate of Analysis.
Solvent/Matrix: H_2O

Ion Chromatography Bromate Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-BRO39-2Y**	78.69	- - - -
500mL	Poly Bottle	**AS-BRO39-2X**	151.01	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Bromate anion at 1000µg/mL in aqueous solution of $NaBrO_3$.
With Certificate of Analysis.
Solvent/Matrix: H_2O

Ion Chromatography Bromide Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-BR9-5Y**	53.35	- - - -
500mL	Poly Bottle	**AS-BR9-5X**	96.79	- - - -
125mL	Poly Bottle	**AS-BR9-2Y**	53.35	- - - -
500mL	Poly Bottle	**AS-BR9-2X**	96.79	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Sodium Bromide (NaBr), 0.1M: AS-BR9-5Y, -5X
Bromide anion at 1000µg/mL in aqueous solution of NaBr: AS-BR9-2Y, -2X
Solvent/Matrix: H_2O

Ion Chromatography Chloride Standard IC

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-CL9-2Y**	53.35	- - - -
500mL	Poly Bottle	**AS-CL9-2X**	96.79	- - - -

For use with EPA Method 300.0 (Revision 2.1) and ASTM* Method D4327.
Chloride anion at 1000µg/mL in aqueous solution of NaCl.
With Certificate of Analysis.

Ion Chromatography Cyanide Reference Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**RSCN9-2Y**	68.60	- - - -
500mL	Poly Bottle	**RSCN9-2X**	105.05	- - - -
500mL	Poly Bottle	**RSCN9C-2X**	105.05	- - - -

Product Specifications

For Use In	Matrix	Contents	Cat. No.
EPA Methods 335.2 and 335.3; ASTM* Method D2036-19; and Standard Method 4500-CNF.	H_2O/2% KOH	1000µg/mL: KCN	**RSCN9-2X, -2Y**
EPA Method 335.1	H_2O/2% KOH	1000µg/mL: $K_3Fe(CN)_6$	**RSCN9C-2X**

Ion Chromatography Fluoride Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-F9-5Y**	53.35	- - - -
125mL	Poly Bottle	**AS-F9-1AY**	48.09	- - - -
500mL	Poly Bottle	**AS-F9-1AX**	90.38	- - - -
125mL	Poly Bottle	**AS-F9-1Y**	48.09	- - - -
500mL	Poly Bottle	**AS-F9-1X**	91.63	- - - -
125mL	Poly Bottle	**AS-F9-2Y**	53.35	- - - -
500mL	Poly Bottle	**AS-F9-2X**	96.79	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Sodium Fluoride (NaF), 0.1M: AS-F9-5Y
Fluoride anion at 10µg/mL in aqueous solution of NaF: AS-F9-1AY, -1AX
Fluoride anion at 100µg/mL in aqueous solution of NaF: AS-F9-1Y, -1X
Fluoride anion at 1000µg/mL in aqueous solution of NaF: AS-F9-2Y, -2X
With Certificate of Analysis.
Solvent/Matrix: H_2O

Ion Chromatography Nitrate Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-NO39-2Y**	53.35	- - - -
500mL	Poly Bottle	**AS-NO39-2X**	97.90	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Nitrate anion at 1000µg/mL in aqueous solution of $NaNO_3$.
With Certificate of Analysis.
Solvent/Matrix: H_2O

Ion Chromatography Nitrite Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-NO29-2Y**	53.35	- - - -
500mL	Poly Bottle	**AS-NO29-2X**	96.79	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Nitrite anion at 1000µg/mL in aqueous solution of $NaNO_2$.
With Certificate of Analysis.
Solvent/Matrix: H_2O

Ion Chromatography Nitrite-N Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-NO2N9-2Y**	53.35	- - - -
500mL	Poly Bottle	**AS-NO2N9-2X**	96.79	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Nitrite-N anion at 1000µg/mL in aqueous solution of $NaNO_2$.
With Certificate of Analysis.
Solvent/Matrix: H_2O

Ion Chromatography Phosphate Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-PO49-2Y**	53.35	- - - -
500mL	Poly Bottle	**AS-PO49-2X**	96.79	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Phosphate anion at 1000µg/mL in aqueous solution of KH_2PO_4.
With Certificate of Analysis.
Solvent/Matrix: H_2O

Ion Chromatography Phosphate-P Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-PO4P9-2Y**	53.35	- - - -
500mL	Poly Bottle	**AS-PO4P9-2X**	96.79	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Phosphate-P anion at 1000µg/mL in aqueous solution of KH_2PO_4.
With Certificate of Analysis.
Solvent/Matrix: H_2O

Ion Chromatography Sulfate Standard

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**AS-SO49-2Y**	53.35	- - - -
500mL	Poly Bottle	**AS-SO49-2X**	96.79	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
Sulfate anion at 1000µg/mL in aqueous solution of K_2SO_4.
With Certificate of Analysis.
Solvent/Matrix: H_2O

Ion Chromatography, Multi-Element

Ion Chromatography Instrument Check Standard 1

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**ICMIX1-100**	136.70	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
With Certificate of Analysis.

Components in H_2O:

Cl^-	30µg/mL
F^-	20µg/mL
NO_3^-	100µg/mL
HPO_4^{-2}	150µg/mL
SO_4^{-2}	150µg/mL

Ion Chromatography Instrument Check Standard 2

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**ICMIX2-100**	153.52	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
With Certificate of Analysis.

Components in H_2O:

Br^-	400µg/mL
Cl^-	200µg/mL
F^-	100µg/mL
NO_3^-	400µg/mL
HPO_4^{-2}	600µg/mL
SO_4^{-2}	400µg/mL

Ion Chromatography Instrument Check Standard 3

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**ICMIX3-100**	157.95	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
With Certificate of Analysis.

Components in 2% HNO_3:

Ca^{+2}	1000µg/mL
K^+	200µg/mL
Li^+	50µg/mL
Mg^{+2}	200µg/mL
Na^+	200µg/mL
NH_4^+	400µg/mL

*Trademark. See Trademark Reference.

Prices subject to change.

Ion Chromatography Instrument Check Standard 6

Quantity	Packaging	Cat. No.	Each	Case of
125mL	Poly Bottle	**ICMIX6-100**	206.38	- - - -

For use with EPA Method 300.0 and ASTM* Method D4327.
With Certificate of Analysis.

Components in water:

Br^-	100µg/mL
Cl^-	50µg/mL
F^-	20µg/mL
HPO_4^{-2}	150µg/mL
NO_3^--N	25µg/mL
NO_2^--N	25µg/mL
SO_4^{-2}	150µg/mL

Quality Control/Proficiency Samples, Water

Total Residual Chlorine Drinking Water/Wastewater Standard

ULTRAcheck* Blind QC Standard

Quantity	Packaging	Cat. No.	Each	Case of
10mL	Ampule	**US-QCI-780**	48.94	- - - -

Total Residual Chlorine at 0.3-5.0mg/L when diluted to 2 liters.

Minerals Drinking Water/Wastewater Standard

ULTRAcheck* Blind QC Standard

Quantity	Packaging	Cat. No.	Each	Case of
500mL	Poly Bottle	**US-QCI-710**	70.71	- - - -

Traceable to NIST*.

Component concentrations in ready-to-use solution:

Alkalinity (as $CaCO_3$)	100-300mg/L
pH	5-10 units
Chloride	10-250mg/L
Potassium	2-330mg/L
Conductivity	500-2500µmhos
Sodium	50-300mg/L
Sulfate	3-400mg/L
Fluoride	1-10mg/L
Nitrate	1-14mg/L

Solids Drinking Water/Wastewater Standard

ULTRAcheck* Blind QC Standard

Quantity	Packaging	Cat. No.	Each	Case of
500mL	Poly Bottle	**US-QCI-711**	57.08	- - - -

Component concentrations in ready-to-use solution:

Suspended Solids	20-200mg/L
Dissolved Solids	50-5000mg/L
Total Solids	70-5200mg/L

Trace Metals Wastewater Standard

ULTRAcheck* Blind QC Standard

Quantity	Packaging	Cat. No.	Each	Case of
10mL	Ampule	**US-QCI-700**	57.08	- - - -

For AA and ICP methods.
Traceable to NIST*.

Component concentrations when diluted to 1L:

Aluminum	100-1000µg/L
Antimony	20-250µg/L
Arsenic	20-250µg/L
Barium	100-1000µg/L
Beryllium	20-250µg/L
Boron	100-1000µg/L
Cadmium	20-250µg/L
Chromium	100-1000µg/L
Cobalt	100-1000µg/L
Copper	100-1000µg/L
Iron	100-1000µg/L
Lead	100-1000µg/L
Manganese	100-1000µg/L
Mercury	2-20µg/L
Molybdenum	100-1000µg/L
Nickel	100-1000µg/L
Selenium	20-250µg/L
Silver	20-250µg/L
Strontium	100-1000µg/L
Thallium	20-250µg/L
Vanadium	100-1000µg/L
Zinc	100-1000µg/L

Quantity	Packaging	Cat. No.	Each	Case of
1.2mL	Ampule	**603-XM**	18.15	- - - -

Components at 2000µg/mL in Methanol:

Acrolein
Acrylonitrile

Alternate BTEX Standard

EPA Method 602

Quantity	Packaging	Cat. No.	Each	Case of
1.2mL	Ampule	**BTEX21H**	28.50	- - - -

NEW

Components at 2000µg/mL:

Benzene
Ethylbenzene
Toluene
o-Xylene

Components at 1000µg/mL:

m-Xylene
p-Xylene

Solvent/Matrix: P & T Methanol

Base/Neutrals Surrogate Standard Mix

For EPA Method 8270C

Quantity	Packaging	Cat. No.	Each	Case of
1 × 1mL	Ampule	**US-ISM-280N-1**	34.66	- - - -
4 × 1mL	ULTRApak*	**US-ISM-280N**	110.87	- - - -
12 × 1mL	VALUpak*	**US-ISM-280N-V**	291.03	- - - -

Each component at 100µg/mL in Methylene Chloride:

Nitrobenzene-d_5
2-Fluorobiphenyl
p-Terphenyl-d_{14}

Big Mix

Quantity	Packaging	Cat. No.	Each	Case of
1.2mL	Ampule	**76BIGMIX**	97.20	- - - -

Volatile organics mix of 76 certified analytes, each at 1000µg/mL in methylene chloride.
Methylene Chloride is treated to prevent the formation of HCl (a common breakdown product of Methylene Chloride).
Starting materials for the 76 neutral and acid analytes used are highly purified and tested.
The final mix is confirmed by GC/MS.
Easy to use, confidence confirmed, all-in-one, stable standard.

Each component at 1000µg/mL in Methylene Chloride:

Pyridine
n-Nitrosodimethylamine
Phenol
Aniline
bis(2-Chloroethyl)ether
2-Chlorophenol
1,3-Dichlorobenzene
1,4-Dichlorobenzene
Benzyl Alcohol
1,2-Dichlorobenzene
2-Methylphenol
2,2'-oxybis(1-Chloropropane)
3-Methylphenols†
4-Methylphenols†
n-Nitroso-di-n-propylamine
Hexachloroethane
Nitrobenzene
Isophorone
2-Nitrophenol
2,4-Dimethylphenol
bis(2-Chloroethoxy)methane
2,4-Dichlorophenol
1,2,4-Trichlorobenzene
Naphthalene
4-Chloroaniline
Hexachlorobutadiene
4-Chloro-3-methylphenol
1-Methylnaphthalene
2-Methylnaphthalene
Hexachlorocyclopentadiene
2,4,6-Trichlorophenol
2,4,5-Trichlorophenol
2-Chloronaphthalene
2-Nitroaniline
1,4-Dinitrobenzene
1,3-Dinitrobenzene
Dimethylphthalate
Acenaphthylene
2,6-Dinitrotoluene
1,2-Dinitrobenzene
3-Nitroaniline
Acenaphthene
2,4-Dinitrophenol
4-Nitrophenol
Dibenzofuran
2,4-Dinitrotoluene
2,3,5,6-Tetrachlorophenol
2,3,4,6-Tetrachlorophenol
Diethylphthalate
Fluorene
4-Chlorophenyl-phenylether
4-Nitroaniline
4,6-Dinitro-2-methylphenol
n-Nitrosodiphenylamine††
Azobenzene†††
4-Bromophenyl-phenylether
Hexachlorobenzene
Pentachlorophenol
Phenanthrene
Anthracene
Carbazole
Di-n-butylphthalate
Fluoranthene
Pyrene
Butylbenzylphthalate
Bis(2-ethylhexyl)adipate
Benzo(a)anthracene
Chrysene
Bis(2-ethylhexyl)phthalate
Di-n-octyl phthalate
Benzo(b)fluoranthene
Benzo(k)fluoranthene
Benzo(a)pyrene
Ideno(1,2,3-cd)pyrene
Dibenzo(a,h)anthracene
Benzo(g,h,i)perylene

† 3-Methylphenol and 4-Methylphenol concentrations are 500µg/mL
†† n-Nitrosodiphenylamine (8270-listed analyte) decomposes to Diphenylamine (mix component)
††† 1,2-Diphenylhydrazine (8270-listed analyte) decomposes to Azobenzene (mix component)

Internal Standard

EPA Method 8260B

Quantity	Packaging	Cat. No.	Each	Case of
1.2mL	Ampule	**8260-I**	23.33	- - - -

Components at 2000µg/mL in Methanol purge and trap:

Chlorobenzene-d_5
1,4-Dichlorobenzene-d_4
1,4-Difluorobenzene
Pentafluorobenzene

PAH Mixture

For EPA Methods 625, 8270C/Appendix IX

Quantity	Packaging	Cat. No.	Each	Case of

Conversion Factors

Find the unit of measurement from which you want to convert under the column "Unit." Move across the line until you reach the column under the unit to which you want to convert. Multiply your existing measurement by the listed factor to obtain the conversion. (Ex: Suppose you want to convert 5 sq. in. into sq. cm. Find "sq. in." under the "Unit" column in the Area table below. Move across this line until you come to the column under "sq. cm." Multiply 5 sq. in. by 6.452 to get 32.260 sq. cm.)

Area

Unit	Sq. In.	Sq. Ft.	Sq. Yd.	Sq. cm	Sq. m
Sq. In.	1	0.006944	0.0007716	6.452	0.000645
Sq. Ft.	144	1	0.1111	929	0.0929
Sq. Yd.	1296	9	1	8361	0.8361
Sq. cm	0.155	0.001076	0.0001196	1	0.0001
Sq. m	1550	10.76	1.196	10,000	1

Force

Unit	Dyne	Lb.	Newton
Dyne	1	2.248×10^{-6}	10^{-5}
Lb.	444,823	1	4.448
Newton	100,000	0.2248	1

Heat

1 cal./g•°C = 1BTU/lb.•°F = 4.184 joule/g•°C = 4184 joule/kg•°C
1 cal./g = 1BTU/lb. = 4.184 joule/g = 4184 joule/kg

Corn oil (40°C)	1.4734	Strawberries	15 to 11	Grape wine	14 to 18
Ethylene glycol	1.33 to 1.39	Grapes	12 to 24	Bean milk	5 to 13
Hydrochloric acid	1.33 to 1.42	Fruit juices	12 to 17	Egg yolk	45 to 49
Nitric acid	1.33 to 1.38	Canned fruits	15 to 29	Steak sauce	27 to 37
Olive oil (40°C)	1.4679	Tomato puree	7 to 16	Ketchup	27 to 37
Peanut oil (40°C)	1.4691	Tomato juice	5 to 9	Milk	12 to 16
Potassium chloride	1.33 to 1.36	Carbonated beverages	6 to 15	Jam, marmalade	60 to 70
Sodium chloride	1.33 to 1.37	Nectars	16 to 22	Flour	60 to 70
Sulfuric acid	1.33 to 1.40	Acidophilus beverages	17 to 20	Peaches	11 to 16

Note: all values are approximations at 20°C, except where indicated.

Viscosity Values

Centipoise* (cp)	Centistokes (cSt)	Saybolt Second Universal (SSU)	Typical Liquid
1	1	31	Water
3.2	4	40	Milk
12.6	15.7	80	Number 4 fuel oil
16.5	20.6	100	Cream
34.6	43.2	200	Vegetable oil
88	110	500	SAE 10 oil
176	220	1000	Tomato juice
352	440	2000	SAE 30 oil
880	1100	5000	Glycerine
1561	1735	8000	SAE 50 oil
1760	2200	10,000	Honey
3000	4500	20,000	Glue
5000	6250	28,000	Mayonnaise
8640	10,800	50,000	Molasses B
15,200	19,000	86,000	Sour cream
17,640	19,600	90,000	SAE 70 oil

*Centipoise = centistokes x specific gravity where specific gravity is assumed to be 0.8 (except for water). To find the exact cp of your fluid: **cp = cSt x (weight per gallon x 0.120).**

General Technical Data

Hydrometer Correction Table

Factors apply to hydrometers calibrated at 60°/60°F specific gravity, the ratio of the liquid density at 60°F to the density of water at 60°F. To determine the corrected specific gravity, divide the correction factor by 1000 and add it to the measured value.

Example:
Measured specific gravity at 20°C: 1.0000
Correction factor: 0.7000/1000 = 0.0007
Corrected specific gravity: 1.0000 + 0.0007 = 1.0007

Liquid Densities*

Liquid	Grams/mL	Pounds/cu ft	Temperature
Acetone	0.792	49.4	20°C
Alcohol, ethyl	0.791	49.4	20°C
Alcohol, methyl	0.810	50.5	0°C
Benzene	0.899	56.1	0°C

Equations

Density Conversions

Specific Gravity x 1 = g/mL
g/L x 8.345404 = lb/gal
lb/gal x 0.119826 = g/mL

Humidity

Absolute humidity (as g/m³)

$$D = \frac{804}{1 + 0.00633t} \times \frac{e}{P_o}$$

$$= \frac{H}{100} \times \frac{804}{1 + 0.00633t} \times \frac{e}{P_o}$$

H = relative humidity (% RH)
P_o = standard air pressure (mmHg)
D = absolute humidity (g/m³)
e = water steam pressure (mmHg)
D_s = absolute humidity in saturation (g/m³)
e_s = saturated water steam pressure (mmHg)
t = temperature (°C)
T = dew point temperature

Dew point temperature (as °C)

$$T = \frac{237.3/75}{\log e - 0.786} - 1$$

$$e = \frac{H}{100} \times e_s;\ e_s = 6.1078 \times 10^{7.5t/(237.3 + t)}$$

Relative humidity (as % RH)

$$RH = \frac{e_s}{e} \times 100 = \frac{D}{D_s} \times 100$$

Temperature

°F = (1.8 x °C) + 32
°C = (°F – 32) x 0.555
°Kelvin = °C + 273.2

Heating and Cooling

Cooling capacity of chillers

$$\text{Btu/hr} = \frac{\Delta T\ (°F) \times \text{Specific heat of fluid}}{\text{flowrate (GPM)}}$$

Specific heat of water = 500 Btu/hr/GPM/°F
Specific heat of oil = 350 Btu/hr/GPM/°F

Heating water in tanks

$$\text{kW} = \frac{\text{Volume (gallons)} \times \Delta T\ (°F)}{325 \times \text{Heat-up time (hours)}}$$

Heating oil in tanks

$$\text{kW} = \frac{\text{Volume (gallons)} \times \Delta T\ (°F)}{800 \times \text{Heat-up time (hours)}}$$

Heating flowing water

kW = Flow (GPM) x ΔT (°F) x 0.16

Relative Centrifugal Force

$rcf = (11.18 \times 10^{-6})\ RN$

R = rotating radius in cm
N = rotation speed in rpm

Concentration

$$\text{Molar (M)} = \frac{\text{Moles of solute}}{\text{Liters of solution}}$$

$$\text{Weight \%} = \frac{\text{Grams of solute} \times 100\%}{\text{Grams of solute + grams of solvent}}$$

$$\text{Volume \%} = \frac{\text{Liters of solute} \times 100\%}{\text{Liters of solution}}$$

$$\text{ppm} = \frac{\text{mg of solute}}{\text{kg of solution}} = \frac{\text{mg of solute}}{\text{Liters of water}}$$

Electrical Data

Electrical Terminology

Volt (E) is the unit of electric pressure or electromotive force. It is the potential that will produce a current of 1 ampere through a resistance of 1 ohm.

Ampere (I) is the unit of electrical current (coulombs per second).

Ohm (R) is the unit of electrical resistance (volts/ampere).

Watts (W) and **kilowatts** (KW) are units of electric power.

Kilovolt-ampere (KVA) is a measurement of apparent electric power.

Kilowatt hour (Kwhr) is a unit of electrical energy or work performed.

Joule (J) is a metric unit of energy: watt per second.

1 Kwhr = 2,655,000 ft-lb = 1.341 hp-hr = 3413 Btu = 3,600,000 joules.

Ohm law relationships (direct current)

$E = IR + W/I = \sqrt{WR}$

$W = I^2R = E^2/R = EI$

$I = E/R = W/E = \sqrt{W/R}$

$R = E/I = W/I^2 = E^2/W$

For electrical formulas, see the chart below. Use the symbols above plus the ones defined in the text above the table.

Properties of Conductors

Size (AWG MCM)	Area circle (mils)	Concentric lay conductors		Bare conductors		DC resistance Ω/M ft at 77°F (25°C)*

*The resistance values given in the last three columns apply only to direct current. When using conductors larger than number 4/0 with alternating current, use the multiplying factors in the table below to compensate for skin effect.

Electrical Formulas

Use the symbols in Electrical Terminology above, plus:

eff = efficiency (expressed as a decimal)

pf = power factor (expressed as a decimal)

hp = horsepower output

Required	Direct current	Alternating current	
		Single-phase	3-phase[†]
KVA	—	$\frac{IE}{1000}$	$\frac{1.73\ IE}{1000}$
Kilowatts	$\frac{IE}{1000}$	$\frac{IE\ (pf)}{1000}$	$\frac{1.73\ IE\ (pf)}{1000}$
Horsepower (output)	$\frac{IE\ (eff)}{746}$	$\frac{IE\ (eff)(pf)}{746}$	$\frac{1.73\ IE\ (eff)(pf)}{746}$
Joules	$\frac{IE}{sec}$	$\frac{IE\ (eff)(pf)}{sec}$	$\frac{1.73\ IE\ (eff)(pf)}{sec}$
Amperes (hp known)	$\frac{746\ (hp)}{E\ (eff)}$	$\frac{746\ (hp)}{E\ (eff)(pf)}$	$\frac{746\ (hp)}{1.73\ E\ (eff)(pf)}$
Amperes (KW known)	$\frac{1000\ KW}{E}$	$\frac{1000\ KW}{E\ (pf)}$	$\frac{1000\ KW}{1.73\ E\ (pf)}$
Amperes (kva known)	—	$\frac{1000\ KVA}{E}$	$\frac{1000\ KVA}{1.73\ E}$

[†] For 3-phase systems, E is measured line to line and I is phase current.

Multiplying Factors for Converting Resistance to 60-Hertz AC Resistance

2000 MCM	1.233	1.100	1.82	1.56

Regulatory Agencies and Approvals

ASCII: American Standard Code for Information Interchange is a method of encoding characters into 7 or 8 binary bits (typically 7 bits plus an 8th bit for parity).

ANSI: The American National Standards Institute is a private organization that coordinates the creation of voluntary standards in a number of fields including engineering, electronics, and construction.

ASTM: The American Society for Testing and Materials is a scientific and technical organization that develops material standards and testing methods.

DIN: The Deutsche Industrie Normen is a German organization that develops standards from physical quantities engineering to material engineering.

FDA: Food & Drug Administration is responsible for approving food and drugs for widespread use. Definitions for proper use are found in a series of regulations published annually under Government Regulations CFR 21.

NEMA: The National Electrical Manufacturers Association is a trade association of electrical equipment manufacturers that develops and publishes many manufacturing standards.

NIST: The National Institute of Standards and Technology is a U.S. government agency that provides standard reference materials and calibration services. NIST-certified instruments are calibrated at NIST. NIST-traceable instruments are factory calibrated against NIST-certified standards.

OEM: Products used by Original Equipment Manufacturers in the design of equipment.

OSHA: The Occupational Safety and Health Administration oversees and regulates workplace health and safety.

UL: Underwriters Laboratories, Inc. is concerned with safety of personnel and property. UL listing indicates compliance with UL safety standards for electrical, mechanical, and fire hazards.

USP Class VI: Safety evaluation standards of the U.S. Pharmacopoeia/ National Formulary for biocompatibility with plastics.

Acid-Base Indicator Selection

Name	Visual Transition Interval (pH)	Color Change
Thymol Blue	1.2 – 2.8	Red to Yellow
Thymol Blue, Sodium Salt		Red to Yellow
Bromophenol Blue	3.0 – 4.6	Yellow M Blue
Bromophenol Blue, Sodium Salt		Yellow to Blue
Congo Red	3.0 – 5.0	Blue to Red
Dyphenycarbazone- Bromophenol Blue	3.0 – 7.0	Yellow to Blue
Methyl Orange-Xylene Cyanole Solution	3.2 – 4.2	Purple to Green
Methyl Orange Sodium Salt	3.2 – 4.4	Red to Yellow
Bromocresol Green	3.8 – 5.4	Yellow to Blue
Bromocresol Green, Sodium Salt		Yellow to Blue
Methyl Red	4.2 – 6.2	Pink to Yellow
Methyl Red Hydrochloride		Pink to Yellow
Methyl Red, Sodium Salt		Pink to Yellow
Rosolic Acid	5.0 – 8.0	Yellow to Red
Bromocresol Purple	5.2 – 6.8	Yellow to Purple
Alizarin	5.8 – 7.2	Yellow to Red
Bromothymol Blue	6.0 – 7.6	Yellow to Blue
Bromothymol Blue, Sodium Salt		Yellow to Blue
m-Nitrophenol	6.8 – 8.6	Colorless to Yellow
Phenol Red	6.8 – 8.2	Yellow to Red
Phenol Red, Sodium Salt		Yellow to Red
Cresol Red	7.0 – 8.8	Yellow to Violet Red
Thymol Blue	8.0 – 9.2	Yellow to Blue
Thymol Blue, Sodium Salt		Yellow to Blue
Phenolphthalein	8.0 – 10.0	Colorless to Red
Thymolphthalein	8.8 – 10.5	Colorless to Blue
Alizarin	11.0 – 13.0	Red to Purple
5,5'-Indigodisulfonic Acid, Disodium Salt	11.4 – 13.0	Blue to Yellow
Acid Fuchsin	12.0 – 14.0	Red to Colorless

Concentrations of Acids and Bases

Common Commercial Strength of	Molecular Weight	Moles/ Liter	Grams/ Liter	Percentage by Weight	Specific Gravity
Acetic Acid, Glacial	60.05	17.4	1045	99.5	1.05
Acetic Acid	60.05	6.27	376	36	1.045
Formic Acid	46.02	23.4	1080	90	1.20
Hydrochloric Acid	36.5	11.6	424	36	1.18
		2.9	105	10	1.05
Nitric Acid	63.02	15.99	1008	71	1.42
		14.9	938	67	1.42
		13.3	837	61	1.37
Perchloric Acid	100.5	11.65	1172	70	1.67
		9.2	923	60	1.54
Phosphoric Acid	80.0	18.1	1445	85	1.70
Sulfuric Acid	98.1	18.0	1766	96	1.84
Ammonium Hydroxide	35.0	14.8	251	28	0.898
Potassium Hydroxide	56.1	13.5	757	50	1.52
		1.94	109	10	1.09
Sodium Hydroxide	40.0	19.1	763	50	1.53
		2.75	111	10	1.11

Addition Formulas

Compound	Lab Addition Rate	Cellar Addition Rate
Acids (Increase TA)	+0.1g/100mL	=3.8g tartaric/gal.wine =8.3 lb. tantaric/1000 gal. wine =7.4 lb. malic/1000 gal. wine =7.4 lb. citric/1000 gal. wine
Ascorbic acid (treat disulfides, add copper and carbon afterwards)	+10ppm	=0.1mL of 1% solution in 100mL wine=3.78mL/gal. =37.85g asorbic acid crystals in 1000 gal. wine
Potassium carbonate	reduce TA by 0.1g/100mL	=2.5g/gal. calcium carbonate = 5.5 lb./1000 gal. wine =3.8g/gal. potassium carbonate = 8.3 lb./1000 gal. wine
Copper (treats sulfides) DO TRIALS FIRST	+0.1ppm as Cu	=0.15mL of 1% $CuS0_4$ solution/1000 gal. wine =0.1mL of 0.05% $CuS0_4$ in 120mL. (4 oz.) wine =1.5g $CuS04\ .5H_20$ per 1000 gal. wine
Hydrogen peroxide (reduce $S0_2$) (Not legal for commercial wine)	~10ppm $S0_2$	approx 1mL H_20_2 3% /gal. wine DO TRIALS FIRST!
Potassium metabisulfte (add $S0_2$)	+100ppm $S0_2$	=.76 gal.=760g/1000gal.=20g/hl = 002g/L = 7.6mL/gal.=2mL/ L of 10% KMBS solution (-5% $S0_2$)
Any soluble compound	1% +1lb/ 1000 gal.	1g/100mL = 7.50g/750mL=37.85g/gal. = 0.45g/gal.=0.012g/100mL= 0.09g/750mL

Other Calculations

Normality:

Normality (1) x Volume (1) = Normality (2) x Volume (2)

$$\text{OR volume to add} = \frac{\text{normality desired x volume desired}}{\text{normality of concentrated solution}}$$

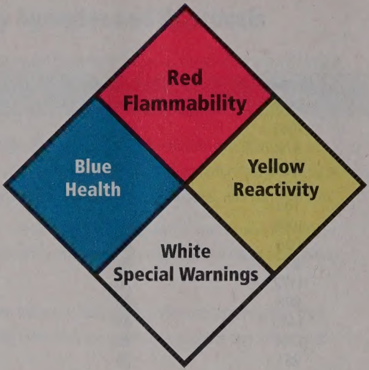
Percentage (% additions):

% (1) x Volume (1) = % (2) x Volume (2)

$$\text{OR amount to add} = \frac{\text{\% desired x total volume desired}}{\text{\% solution to be added}}$$

Parts per million (ppm) = mg/L

$$\text{Amount to add in grams} = \frac{\text{(gallons wine) x 3.785 x desired ppm}}{1000}$$



NFPA Hazard Code Ratings

The National Fire Protection Association has developed a numerical rating system that reflects the health, flammability, self-reactivity, and other hazards of materials, including its reaction with water, specified in NFPA 704, *Standard System for the Identification of the Hazards of Materials for Emergency Response.*

Potential hazards are evaluated based on the degree of hazard, and the numerical rating is placed inside the universal NFPA symbol.

HEALTH

HEALTH HAZARDS

4 Very short exposure to material can cause death or major residual injury even if prompt medical treatment is given.

3 Short exposure to material can cause serious temporary or residual injury even if prompt medical treatment is given.

2 Intense or continued exposure to material can cause temporary incapacitation or possibly residual injury unless prompt medical treatment is given.

1 Exposure to material will cause irritation but only minor residual injury even if no treatment is given.

0 Exposure to materials under fire conditions will offer no hazard beyond that of ordinary combustible material.

FLAMMABILITY

FLAMMABILITY

4 Material will rapidly or completely vaporize at atmospheric pressure and normal ambient temperature, or will burn readily when dispersed in air.

3 A liquid or solid that can be ignited under almost all ambient temperature conditions.

2 Material that must be moderately heated or exposed to relatively high ambient temperatures before ignition can occur.

1 Material that must be preheated before ignition can occur.

0 Material that will not burn.

REACTIVITY

REACTIVITY

4 Material is readily capable of detonation or of explosive decomposition or instability at normal temperatures and pressures.

3 Material is capable of detonation or explosive reaction but requires a strong initiating source; or which must be heated under confinement before initiation; or may react explosively with water.

2 Material is normally unstable and readily undergoes violent chemical change but does not detonate. Also may react violently with water or may form potentially explosive mixtures with water.

1 Material is normally stable but can become unstable at elevated temperatures and pressures or may react with water with some release of energy, but not violently.

0 Material is normally stable even under fire exposure conditions, and is not reactive with water.

SPECIAL WARNINGS

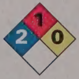
SPECIAL WARNINGS

OX Oxidizing material

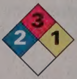
~~W~~ Material is hazardous when in contact with moisture or water

---

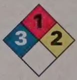
EXAMPLES:



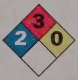
1,1,1-Trichloroethane



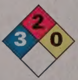
Isopropyl ether



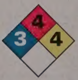
Calcium



Benzene



Acetic acid, glacial

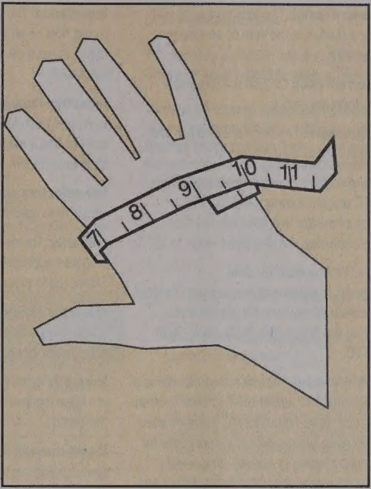


Picric acid, wet, with not less than 10% water

Glove Sizing Guide

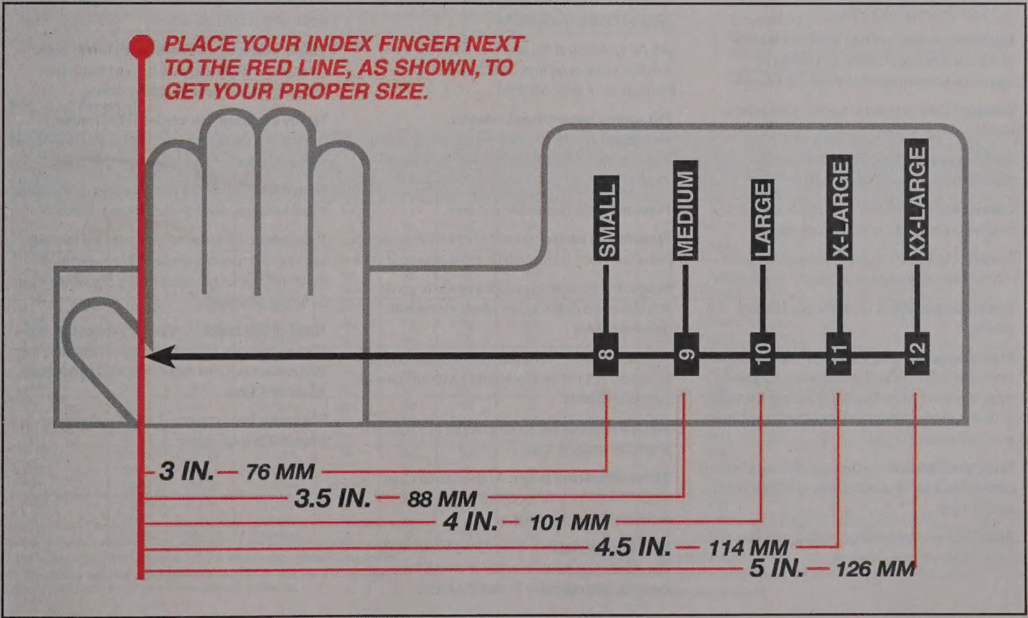
Selecting the right glove size means a comfortable, safe fit, and helps ensure that workers will wear their gloves. Gloves that are too large reduce dexterity and can get caught in machinery. Gloves that are too small are binding and cause the hand to tire more quickly.

To find your glove size, use a tape measure to determine the circumference of your hand around the palm area. If your hand circumference is 9", for example, your closest glove size is a 9. Be aware that gloves can also come in non-numerical sizes. In most cases, the size conversion chart below should be a good guide.



Non-numerical Size	Numerical Size
Extra Small (XS)	6-7
Small (S)	7-8
Medium (M)	8-9
Large (L)	9-10
Extra Large (XL)	10-11
Extra Extra Large (XXL)	11-12

Of course, there are other methods for determining glove size. For your convenience, one of our suppliers has created the following chart that bases glove size on hand width. Please feel free to use it as well, understanding that all of these resources are just guides. Glove sizing varies, depending on manufacturer, origin, and style. Your exact fit will ultimately be found only through use.



PLACE YOUR INDEX FINGER NEXT TO THE RED LINE, AS SHOWN, TO GET YOUR PROPER SIZE.

Glossary of Technical Terms

Accuracy: The degree of precision. Usually expressed, in terms of error, as a percentage of the specified value, or as a percentage of a range.

Absolute pressure (psia): The total force per unit area exerted by a fluid. It is the sum of atmospheric and gauge pressures.

Alternating current (AC): Current that reverses polarity at a uniform frequency.

Atmospheric pressure: The force exerted per unit area by the weight of the atmosphere.

Automatic temperature compensation (ATC): meters with ATC receive a continuous signal from a temperature sensor in a solution and then automatically standardize the displayed value to 25°C.

Baud rate: A unit of measure for data transmission speed. It represents the number of signal elements (typically bits) transmitted per second. Typical baud rates are 300, 1200, 2400, 4800, 9600, 14400, and 28800.

Buffer: In chemistry terms, a solution that maintains a set pH value regardless of added acids or bases; often used for calibration. In computer terms, a device used to store data temporarily, normally to compensate for differences in speed between system components (for example, a high-speed data acquisition board and main memory).

Byte: Eight related bits of information processed as a unit. Eight bits equal one byte.

Cavitation: Process in which small bubbles are formed and implode violently. This results in aggressive cleaning action in ultrasonic cleaners.

Contacts: Elements used to mechanically make or break an electric circuit.

Continuous duty: A device able to operate continuously with no off or rest periods.

Convection: Transmission of energy or mass in a medium by movement of the medium itself.

Density: The mass of a given substance per unit volume, often expressed as pounds/ft^3 or grams/cm^3.

Direct current (DC): A current with a constant polarity.

Explosion-proof (XPRF) motor: A totally enclosed motor that will withstand an explosion of a specific vapor or gas within its housing, or will prevent sparks or flashes generated within its housing from igniting surrounding vapor or gas.

Factory calibration: The tuning or altering of a control device by the manufacturer to bring it into specification.

Gain: Ratio of output voltage, current, or power to input voltage, current, or power.

Gauge pressure (psig): A measure of the force per area exerted by a fluid using atmospheric pressure as a zero reference.

Impedance: The opposition in an electric circuit to the flow of an alternating current. It consists of ohmic resistance, inductive reactance, and capacitive reactance.

Inductive load: Electrical devices made of wound or coiled wire. Current passing through the coil creates a magnetic field that in turn produces mechanical work.

Ion-selective electrode (ISE): An electrode that is sensitive to specific ions in a solution.

Linearity: The degree to which performance or response approaches the condition of being linear. Expressed in percent.

Normally closed (NC): A switch in which the contacts are closed (contacting) without any external force acting upon it.

Normally open (NO): A switch in which the contacts are open (separated) when no external forces act upon the switch.

On/off control: A simple control system in which the device being controlled is either full on or full off, with no intermediate operating positions.

Parallel transmission: The transmission of data bits over different lines, usually simultaneously; as opposed to serial transmission.

pH: An indication of the acidity or alkalinity of a solution. Units range from 0 (most acidic), to 7 (neutral), to 14 (most alkaline).

PID control (proportional, integral, derivative): Control in which the control signal is a linear combination of the error signal, its integral, and its derivative.

Pressure: Force exerted per unit area.

Proportional control: Control in which the amount of corrective action is proportional to the amount of error.

Range: The limits within which a device or circuit operates or the distance over which a transmitter operates reliably.

RS-232: A standard computer interface used primarily to connect PCs and microprocessors with instruments, such as pH meters.

Serial transmission: Sending one bit at a time on a single transmission line.

Series (Universal) motor: A non-induction type motor utilized for small equipment. Speed will decrease as load increases.

Shaded-pole motor: A low-starting torque motor that depends on induced current to create the magnetic field necessary to start the motor.

Single-phase motor: Any motor energized by a single alternation voltage.

Single-pole, double-throw (SPDT): A switch that in one position completes one of two circuits. In the second position the switch completes a second circuit and breaks the first circuit.

Single-pole, single-throw (SPST): A switch that will open or complete a circuit.

Solid-state: Any element that controls current without moving parts, heated filaments, or vacuum gaps.

Standard operating conditions, standard temperature and pressure (STP): Defined temperature and pressure to which all values are referenced for comparison. Generally 760mmHg (1 atm), 25°C.

Stop bit: A signal following a character or block that prepares the receiving device to receive the next character or block.

Temperature compensation: Correction for the influence of temperature on a measurement.

Tolerance: The maximum allowable deviation from a specified standard, as the range of variation permitted, expressed in actual values or more often as a percentage of the nominal value.

Totally enclosed (TE) motor: Motors that prevent the free flow of air from the inside of the motor enclosure to the outside.

Totally enclosed, nonventilated (TENV) motor: A motor in a totally enclosed housing that is not equipped with an external cooling device.

Totally enclosed, fan-cooled (TEFC) motor: A motor in a totally enclosed housing that is equipped with a separate external blower.

Transducer: Any device that generates an electrical signal from real-world physical measurements.

Transmitter: A device that translates the low-level output of a sensor or transducer to a higher level signal suitable for transmission to a site where it can be further processed.

Three-phase motor: A relatively inexpensive, self-starting motor (no starting winding or capacitor); can start heavy loads. The motor requires a three-phase AC power supply.

Viscosity: The resistance of a fluid to flow when subjected to shear stress.

Chemical Resistance and Physical Properties of Plastics

Resin Codes

ECTFE:	Ethylene- chlorotrifluoroethylene copolymer
ETFE:	Ethylenetetrafluoroethylene
FEP:	Fluorinated ethylene propylene
FLPE:	Fluorinated high-density polyethylene
FLPP:	Fluorinated polypropylene
HDPE:	High-density polyethylene
LDPE:	Low-density polyethylene
NYL:	Nylon (polyamide)
PPCO:	Polypropylene copolymer
PC:	Polycarbonate
PETG:	Polyethylene terephthalate copolyester
PK:	Polyketone
PFA:	Perfluoroalkoxy
PMMA:	Polymethyl methacrylate
PMP:	Polymethylpentene
PP:	Polypropylene
PS:	Polystyrene
PSF:	Polysulfone
PTFE:	Polytetrafluoroethylene
PUR:	Polyurethane
PVC:	Polyvinyl chloride
PVDF:	Polyvinylidene fluoride
TPE:	Thermoplastic elastomer
XLPE:	Cross-linked high-density polyethylene

Do not store strong oxidizing agents in plastic labware except if made of FEP, PFA, or PTFE. Other plastics will become brittle after prolonged exposure.

Do not place plastic labware directly in a flame or on a hotplate unless specified.

Use these charts as general guides only. They are recommendations, not guarantees, of fitness for particular uses. Test materials under actual conditions first before using them for your applications.

[*] For oxidizing acids, see table entry "Oxidizing agents, strong." [†] TPE gaskets

E—No damage after 30 days of constant exposure.

G—Little or no damage after 30 days of constant exposure.

F—Some effect after seven days of constant exposure. Depending on the plastic, the effect may be cracking, crazing, loss of strength, or discoloration. Solvents may cause softening, swelling, and permeation losses with PPCO, PP, PMP, LDPE, and HDPE; the solvent effects on these materials are normally reversible.

N—Not recommended for continuous use. Immediate damage may occur. Depending on the plastic, the effect will be severe cracking, crazing, loss of strength, discoloration, deformation, dissolution, or permeation loss.

Care of Plasticware

General Cleaning

Washing Plastics with a Mild Detergent is sufficient for most general applications. Be sure to rinse with tap water, and then rinse again with distilled water. Most plastics, particularly the polyolefins (PPCO, PP, PMP, LDPE, and HDPE), have nonwetting surfaces that resist attack and are easy to clean. Do not use abrasive cleaners or scouring pads on any plastic labware. Do not use strong alkaline cleaning agents with polycarbonate (PC).

Labware Washing Machines can be used with most resins except acrylic, polystyrene (PS), and LDPE due to temperature limitations. PC will be weakened by repeated washings in dishwashers. PC labware exposed to high stresses (centrifuge ware, vacuum chambers) should always be washed by hand using mild, nonalkaline detergents. For PS, use a mild, neutral pH, nonabrasive, noncaustic detergent without sheeting agents. Set water temperature no higher than 135°F (57°C), and keep exposure as short as possible. Avoid excessive abrasion of plastics in dishwashers by covering metal spindles with soft material such as plastic tubing. Labware should be weighted down and held in place with accessory racks.

Ultrasonic Cleaners can be used as long as labware does not rest on the bottom of the tank. Use a cleaning basket for best results.

Removing Grease and Oils. Washing with a mild detergent will remove grease and oils in many situations. Another effective method is to boil labware in dilute sodium bicarbonate ($NaHCO_3$). Do not use this method with acrylic, PC, PS, or LDPE.

To remove grease and oils, you can use organic solvents (such as acetone, alcohols, or methylene chloride) with caution. Extended exposure to these solvents may cause polyolefins to swell. Rinse off all solvents before using labware. Use only alcohols on PC, PS, PSF, or PVC; other organic solvents attack these plastics. Do not use organic solvents with acrylic.

Removing Organic Matter. Soaking plastic in a chromic acid solution will remove organic matter, but since it is a strong oxidizing agent, it will eventually embrittle plastics. To minimize embrittlement, soak for no more than 4 hours.

To make the recommended chromic acid solution: Dissolve 120 g of sodium dichromate ($Na_2Cr_2O_7 \bullet 2H_2O$) in 1000 mL tap water. Add 1600 mL concentrated sulfuric acid. **Note:** Because this solution generates considerable heat, we recommend external cooling. Do not mix in a plastic container.

This solution produces an excess of dichromate in the precipitate form. It dissolves as needed, which extends the solution's life considerably longer than commercially available solutions. The solution can be used repeatedly until it begins to develop a greenish color, indicating a loss of potency.

Sodium hypochlorite solutions (bleaches) are also effective at removing organic matter. Use at room temperature.

Sterilizing Plastics

Autoclaving: Certain chemicals that have no appreciable effects on plastics at room temperature may cause deterioration at autoclave temperatures and therefore must be removed. To avoid baking these contaminants onto the surface of the plastic, carefully clean all items and rinse thoroughly with distilled water before autoclaving.

Because of differences in heat transfer between plastics and inorganic materials, the contents of plastic containers may take longer to reach sterilization temperatures (typically 121°C). Thus, longer autoclaving cycles may be necessary for liquid contents. Cycle lengths can be determined only by experience with specific liquids and containers. Do not autoclave containers (except those made of fluoropolymers) containing detergent or wetting solutions.

Note: Before autoclaving, just set cap or closure on top of the container without engaging threads.

Polypropylene (PP), polypropylene copolymer (PPCO), polymethylpentene (PMP), ETFE, and FEP and PFA can be autoclaved repeatedly at 121°C/15 psi. Cycle length should be at least 15 minutes at 121°C to ensure sterility.

Polysulfone (PSF) and polycarbonate (PC) are autoclavable, but can be weakened by repeated autoclaving. If autoclaved repeatedly, PSF will eventually fail under high-stress applications. After repeated autoclaving, PC shows some loss of mechanical strength and may not function well under high-stress applications such as centrifugation. Limit PSF and PC autoclave cycles to 20 minutes at 121°C.

Polystyrene (PS), polyvinyl chloride (PVC), nylon, acrylic, low-density polyethylene (LDPE), and high-density polyethylene (HDPE) labware and polyurethane tubing are not autoclavable under any conditions.

Note: Some transparent plastics may absorb minute amounts of water vapor and appear cloudy after autoclaving. The clouding will disappear as the plastic dries.

Gas Sterilization: All of the resins mentioned on this page can be gas sterilized (ethylene oxide, formaldehyde). Allow an appropriate aeration time suited to the particular application before using the item.

Chemical Disinfectants: In general, all of the plastics mentioned on this page can be subjected to commonly used disinfectants (formalin, iodophors, quaternary ammonium compounds, benzalkonium chloride). There may be some surface attack (crazing) when using a more chemically aggressive disinfectant for a prolonged time on the less chemical resistant plastics (acrylic, PS, PC, PVC).

Dry Heat: Recommended only for ECTFE, Tefzel ETFE, FEP and PFA, PMP, PSF, and TFE. Maximum temperatures and minimum sterilization times at each temperature are given in the following table:

Resins	Dry heat sterilization	
	Temperature	Time
FEP and PFA, PMP[†], TFE, PSF, ECTFE, Tefzel[*] ETFE	170°C (338°F)	60 min
	160°C (320°F)	120 min
	150°C (302°F)	150 min
	140°C (284°F)	180 min

[†] with no load, no stacking

Microwaving: In general, all plastics allow transmission of microwaves. Among commonly used plastics, PMP and PSF are most transparent to microwaves; we recommend their use when the chemical and temperature resistance of PMP and PSF are compatible with the material to be heated. Use fluoropolymers when heating such aggressive chemicals as acids or solvents; proper ventilation is essential. **Note:** Closure threads must be completely disengaged before heating bottles or containers in a microwave oven.

Hazardous Matter

For Labware Contaminated with Infectious or Toxic Materials, autoclaving is the preferred method for sterilization. However, any method of chemical or heat sterilization compatible with the plastic can be used. Liquid waste that contains biohazardous materials must be decontaminated before disposal.

For Labware Contaminated with Both Biohazardous and Radioactive Material, first sterilize the labware, then remove the radioactive material. Methods for removing radioactive material depend on the isotope used, its quantity, half-life, material, and solubility. For routine decontamination of noninfectious/nontoxic labware, first soak in a decontaminant/cleaner for 24 hours at room temperature. Follow this with several rinsings in distilled water. To accelerate decontamination, increase the cleaner concentration and solution temperature. Always dispose of radioactive wastes and effluents properly.

For more information on handling contaminated labware, contact your Biosafety/Radiation Safety office, or refer to NIH *Biohazardous Safety Guide, Radiation Guide,* and *Laboratory Safety Monograph*.

Trace Level Cleaning

For Most Trace Metal Analyses, plastic is generally less contaminated than glass or other materials. However, plastic does contain trace levels of certain metals. To minimize potential low-level contamination, remove or leach these metals from plastic by soaking in 1N HCl and rinsing in distilled water. For more precise work, use HCl, followed by soaking in 1N HNO_3 and rinsing in distilled water. Soaking time can vary according to individual needs, but plastics should not be soaked longer than 8 hours. **Caution:** Concentrated nitric acid is a strong oxidizing agent and will embrittle many plastics.

To Remove Trace Organics that contribute to trace metal absorption, clean plastic surfaces with alcohol, alkalies, alcoholic alkalies, or chloroform. A final rinse of 1N HCl also minimizes absorption of trace elements.

Care of Glassware

General Cleaning

Good Laboratory Technique demands clean glassware, because the most carefully executed piece of work may give an erroneous result if dirty glassware is used. In all instances, glassware must be physically clean; it must be chemically clean; and in many cases, it must be bacteriologically clean or sterile.

Glassware Must Be Absolutely Grease-Free. The safest criteria of cleanliness is uniform wetting of the surface by distilled water. This is especially important in glassware used for measuring the volume of liquids. Grease and other contaminating materials will prevent the glass from becoming uniformly wetted. This in turn will alter the volume of residue adhering to the walls of the glass container and thus affect the volume of liquid delivered. Furthermore, in pipets and burets, the meniscus will be distorted and the correct adjustments cannot be made. The presence of small amounts of impurities may also alter the meniscus.

Wash Labware as Quickly as Possible after Use. If a thorough cleaning is not possible immediately, put glassware to soak in water. If labware is not cleaned immediately, it may become impossible to remove the residue.

Most new glassware is slightly alkaline in reaction. For precision chemical tests, new glassware should be soaked several hours in acid water (a 1% solution of hydrochloric or nitric acid) before washing.

Brushes with wooden or plastic handles are recommended as they will not scratch or abrade the glass surface.

Sterilizing Glassware

Glassware Which Is Contaminated with blood clots, such as serology tubes, culture media, Petri dishes, etc., must be sterilized before cleaning. It can best be processed in the laboratory by placing it in a large bucket or boiler filled with water, to which 1–2% soft soap or detergent has been added, and boiled for 30 minutes. The glassware can then be rinsed in tap water, scrubbed with detergent, rinsed again.

You may autoclave glassware or sterilize it in a large steam oven or similar apparatus. If viruses or spore-bearing bacteria are present, autoclaving is absolutely necessary.

Rinsing

It Is Imperative that all soap, detergents and other cleaning fluids be removed from glassware before use. This is especially important with the detergents, slight traces of which will interfere with serologic and cultural reactions.

After Cleaning, rinse the glassware with running tap water. When test tubes, graduates, flasks, and similar containers are rinsed with tap water, allow the water to run into and over them for a short time, then partly fill each piece with water, thoroughly shake and empty at least six times. Pipets and burets are best rinsed by attaching a piece of rubber tubing to the faucet and then attaching the delivery end of the pipets or burets to a hose, allowing the water to run through them. If the tap water is very hard, it is best to run it through a deionizer before using.

Rinse the Glassware in a large bath of distilled water. Rinse with distilled water. To conserve distilled water, use a five-gallon bottle as a reservoir. Store it on a shelf near your cleanup area. Attach a siphon to it and use it for replenishing the reservoir with used distilled water.

For Sensitive Microbiologic Assays, meticulous cleaning must be followed by rinsing 12 times in distilled water.

Handling and Storing

To Prevent Breakage when rinsing or washing pipets, cylinders, or burets, be careful not to let tips hit the sink or the water tap.

Dry Test Tubes, Culture Tubes, Flasks, and other labware by hanging them on wooden pegs or placing them in baskets with their mouths downward and allowing them to dry in the air; or place them in baskets to dry in an oven.* Drying temperatures should not exceed 140°C. Line the drying basket with a clean cloth to keep the vessel mouths clean.

Dry Burets, Pipets, and Cylinders by standing them on a folded towel. Protect clean glassware from dust. This is done best by plugging them with cotton, corking, taping a heavy piece of paper over the mouth or placing the glassware in a dust-free cabinet.

Store Glassware in specially designed racks. Avoid breakage by keeping pieces separated.Do not store alkaline liquids in volumetric flasks or burettes. Stoppers or stopcocks may stick.

*Do not apply heat directly to empty glassware which is used in volumetric measurements. Such glassware should be dried at temperatures of no more than 80–90°C.

Care of Stainless Steelware

Use the Proper Tools. When cleaning your stainless-steel products, take care to use non-abrasive tools. Soft cloths and plastic scouring pads will not harm the steel's passive layer. Stainless-steel pads can also be used, but the scrubbing motion must be in the direction of the manufacturer's polishing marks.

Clean with the Polish Lines. Some stainless steels come with visible polishing lines or "grain." When visible lines are present, you should always scrub in a motion that is parallel to them. When the grain cannot be seen, use a soft cloth or plastic scouring pad.

Use Alkaline, Alkaline Chlorinated, or Non-Chloride Containing Cleaners at the recommended strength. While many traditional cleaners are loaded with chlorides, the industry is providing an ever-increasing choice of non-chloride cleaners. If you are unsure of your cleaner's chloride content, contact your cleaner supplier. If they tell you that your present cleaner contains chlorides, ask if they have an alternative. Also, avoid cleaners containing quaternary salts as they also can attack stainless steel and cause pitting and rusting. Never use hydrochloric acid (muriatic acid) on stainless steel.

Clean Frequently to avoid buildup of hard, stubborn stains. If chlorinated cleaners are used, you must rinse thoroughly. Wipe dry immediately to remove all traces of chlorination. After wiping the equipment down, allow it to air dry because oxygen helps maintain the stainless steel's passivity film.

Treat your Water. Softening hard water can do much to reduce deposits. Certain filters can be installed to remove distasteful and corrosive elements. If you are unsure of the proper water treatment for your applications, contact a treatment specialist.

Chemical Resistance of Labware Materials

How to Use This Chart

Use This Chart as a General Guide Only. Test each chemical first before storing in labware. The first letter of each pair represents the resistance rating at 20°C; the second at 50°C.

E—No damage after 30 days of constant exposure.

G—Little or no damage after 30 days of constant exposure.

F—Some effect after 7 days of constant exposure. Depending on the material, the effect may be cracking, crazing, loss of strength, or discoloration. Solvents may cause softening, swelling, and permeation losses with PA, PP, PMP, LDPE, and HDPE; the solvent effects on these materials are normally reversible.

N—Not recommended for continuous use. Immediate damage may occur. Depending on the material, the effect will be severe cracking, crazing, loss of strength, discoloration, deformation, dissolution, or permeation loss.

Effects of Chemicals on Labware

Chemicals may affect the weight, strength, color, dimensions, flexibility, and surface appearance of labware. The basic models of interaction that cause these changes are: (1) chemical attack on the polymer chain, with resultant reduction in physical properties, including oxidation; reaction of functional groups in or on the chain; and depolymerization; (2) physical change, including absorption of solvents, resulting in softening and swelling of the plastic; permeation of solvent through the plastic; or dissolution in a solvent; and (3) stress-cracking from the interaction of a "stress-cracking agent" with molded-in or external stresses.

The reactive combination of compounds of two or more classes may cause a synergistic or undesirable chemical effect. Other factors affecting chemical resistance include: temperature, pressure, internal or external stresses (such as centrifugation), and length of exposure to and concentration of the chemical. As temperature increases, resistance to attack decreases.

***Warning!**

Do not store strong oxidizing agents in plastic containers except those made of Teflon® FEP, PFA, or PTFE. Other plastics will become brittle after prolonged exposure.

*Warning!

The plastic resin information in these tables (does not include SS, glass, or ceramic) has been provided by Nalgene and is reprinted with their permission. It should be used ONLY as a guide for selecting labware for testing.

Test the labware for 72 hours under expected or proposed conditions of use, BEFORE putting into service. Test with care to avoid injury or property damage.

Fisher Scientific does not warrant (neither express nor implied) that the information in these tables is accurate or complete or that any material is suitable for any purpose.

Relative Activity of Restriction Enzymes in 10X Buffers

The 10X Buffer supplied with each restriction enzyme is optimized to give 100% activity at the 1X concentration. In many cases, good activity is also obtained using one of the Fisher BioReagents Quad 4* 10X Buffers. This table may be used to select the best buffer for digestions with multiple restriction enzymes. Enzyme activity is expressed as a percent of the activity obtained with the optimized buffer for each enzyme in a one-hour digest.

Enzyme	Buffer Supplied with Enzyme	A	B	C	D	Universal*	Enzyme Assay Temperature

Restriction Enzyme Buffer Composition (IX)

Buffer	pH (at 37°C)	Tris-HCl (mM)	MgCl$_2$ (mM)	NaCl (mM)	KCl (mM)	DTT (mM)
A	7.5	6	6	6	—	1
B	7.5	6	6	50	—	1
C	7.9	10	10	50	—	1
D	7.9	6	6	150	—	1
E	7.5	6	6	100	—	1
F	8.5	10	10	100	—	1
G	8.2	50	5	—	—	—
H	7.5	90	10	50	—	—
J	7.5	10	7	—	50	1
K	7.4	10	10	—	150	—
L	9.0	10	3	100	—	—

Universal Buffer (1X) = 25mM Tris-acetate (pH 7.5 at 37°C), 100mM potassium acetate, 10mM magnesium acetate, 1mM DTT.

Notes:

1. For each 10°C rise in temperature between 0°C and 25°C, the pH of Tris buffers decreases 0.31 pH units.
2. For each 10°C rise in temperature between 25°C and 37°C, the pH of Tris buffers decreases 0.25 pH units.

IMMUNODETECTION TOOLS

When developing new immunodetection protocols, all product components and their interactions must be considered.

Millipore now provides a full line of immunodetection tools to yield the superior results you are striving for.

IMMOBILON TRANSFER MEMBRANES

Superior Handling Characteristics
Compatible with a variety of detection techniques
Superior Protein Binding and Signal

IMMOBILON-P (0.45µm)

- Sandwich format available: Immobilon-P membrane interleaved with blotting paper
- Recommended for Western, dot, slot, and other blotting applications for proteins >20kDa

IMMOBILON-PSQ (0.22µm)

- Recommended for blotting and sequencing of proteins <20kDa

IMMOBILON-FL

- Low fluorescence PVDF membrane for Western blotting applications

SIZE	QUANTITY/PACK	CATALOG NO.
IMMOBILON-P BLOTTING SANDWICHES: PVDF 0.45µm		
7 x 8.4cm Sheet	20	**IPSN-078-52**
8.5 x 13.5cm Sheet	20	**IPSN-081-32**
IMMOBILON-P: PVDF 0.45µm		
10 x 10cm Sheet	10	**IPVH-101-00**
20 x 20cm Sheet	10	**IPVH-202-00**
26.5cm x 3.75m	Roll 1	**IPVH-000-10**
IMMOBILON-PSQ: PVDF 0.22µm		
10 x 10cm Sheet	10	**ISEQ-101-00**
20 x 20cm Sheet	10	**ISEQ-202-00**
26.5cm x 3.75m	Roll 1	**ISEQ-000-10**
IMMOBILON-FL		
10 x 10cm Sheet	10	**IPFL-101-00**
20 x 20cm Sheet	10	**IPFL-202-00**
26.5cm x 3.75m	Roll 1	**IPFL-000-10**

**Other sizes also available*

Immobilon Western Detection Reagents

THE ULTIMATE DETECTION TOOL with Exceptional Performance and Value

IMMOBILON WESTERN SUBSTRATES ARE OPTIMIZED FOR HIGH SENSITIVITY AND LOW BACKGROUND OVER A BROAD DYNAMIC RANGE AT A CONSIDERABLY LOWER COST THAN OTHER CHEMILUMINESCENT REAGENTS.

Immobilon™ Western
HRP Substrate Peroxide Solution
250 mL Store at 2 – 8 °C
For Research Use Only
Kit Cat. No. WBKLS0500
Millipore Corporation, Billerica, MA 01821 U.S.A.
Immobilon™ Western
HRP Substrate Luminol Reagent
250 mL Store at 2 – 8 °C
For Research Use Only
Kit Cat. No. WBKLS0500
Millipore Corporation, Billerica, MA 01821 U.S.A.

DESCRIPTION	QUANTITY	CATALOG NO.
Chemiluminescent HRP Substrate	100mL	WBKL S0 100
Chemiluminescent AP Substrate	100mL	WBKD S0 100

For additional information on antibodies, please go to ***www.fishersci.com/milliporeantibodies***

- High signal intensity and low background allow detection to the mid femtogram level without enhancers or special buffers
- Reduce antibody consumption at least two- to five-fold compared to less sensitive chemiluminescent substrates

Millipore Broad Selection of Immunodetection Antibodies

Millipore offers a comprehensive line of antibodies for all your immunodetection needs including a complete line of immunohistochemistry (IHC) validated antibodies for neuronal markers of differentiation, development and degeneration.

With the acquisition of Chemicon, Millipore now offers a line of neuroscience antibodies and proteins which are recognized worldwide for their quality and their reproducibility of results in the neuroscience field.

In addition, Millipore has acquired Upstate and now has the integrated expertise to offer customers signal transduction products and cell signaling antibodies.

TERMS AND CONDITIONS OF SALE

UNLESS OTHERWISE EXPRESSLY AGREED IN WRITING, ALL SALES ARE SUBJECT TO THE FOLLOWING TERMS AND CONDITIONS:

1. GENERAL. Fisher Scientific Company L.L.C. ("Seller") hereby offers for sale to the buyer named on the face hereof ("Buyer") the products listed on the face hereof (the "Products") on the express condition that Buyer agrees to accept and be bound by the terms and conditions set forth herein. Any provisions contained in any document issued by Buyer are expressly rejected and if the terms and conditions in this Agreement differ from the terms of Buyer's offer, this document shall be construed as a counter offer and shall not be effective as an acceptance of Buyer's document. Buyer's receipt of Products or Seller's commencement of the services provided hereunder will constitute Buyer's acceptance of this Agreement. This is the complete and exclusive statement of the contract between Seller and Buyer with respect to Buyer's purchase of the Products. No waiver, consent, modification, amendment or change of the terms contained herein shall be binding unless in writing and signed by Seller and Buyer. Seller's failure to object to terms contained in any subsequent communication from Buyer will not be a waiver or modification of the terms set forth herein. All orders are subject to acceptance in writing by an authorized representative of Seller.

2. PRICE. All prices published by Seller or quoted by Seller's representatives may be changed at any time without notice. All prices quoted by Seller or Seller's representatives are valid for thirty (30) days, unless otherwise stated in writing. All prices for the Products will be as specified by Seller or, if no price has been specified or quoted, will be Seller's price in effect at the time of shipment. All prices are subject to adjustment on account of specifications, quantities, raw materials, cost of production, shipment arrangements or other terms or conditions which are not part of Seller's original price quotation.

3. TAXES AND OTHER CHARGES. Prices for the Products exclude all sales, value added and other taxes and duties imposed with respect to the sale, delivery, or use of any Products covered hereby, all of which taxes and duties must by paid by Buyer. If Buyer claims any exemption, Buyer must provide a valid, signed certificate or letter of exemption for each respective jurisdiction.

4. TERMS OF PAYMENT. Seller may invoice Buyer upon shipment for the price and all other charges payable by Buyer in accordance with the terms on the face hereof. If no payment terms are stated on the face hereof, payment shall be net thirty (30) days from the date of invoice. If Buyer fails to pay any amounts when due, Buyer shall pay Seller interest thereon at a periodic rate of one and one-half percent (1.5%) per month (or, if lower, the highest rate permitted by law), together with all costs and expenses (including without limitation reasonable attorneys' fees and disbursements and court costs) incurred by Seller in collecting such overdue amounts or otherwise enforcing Seller's rights hereunder. Seller reserves the right to require from Buyer full or partial payment in advance, or other security that is satisfactory to Seller, at any time that Seller believes in good faith that Buyer's financial condition does not justify the terms of payment specified. All payments shall be made in U.S. Dollars.

5. DELIVERY; CANCELLATION OR CHANGES BY BUYER. The Products will be shipped to the destination specified by Buyer, F.O.B. Seller's shipping point. Seller will have the right, at its election, to make partial shipments of the Products and to invoice each shipment separately. Seller reserves the right to stop delivery of Products in transit and to withhold shipments in whole or in part if Buyer fails to make any payment to Seller when due or otherwise fails to perform its obligations hereunder. All shipping dates are approximate only, and Seller will not be liable for any loss or damage resulting from any delay in delivery or failure to deliver which is due to any cause beyond Seller's reasonable control. In the event of a delay due to any cause beyond Seller's reasonable control, Seller reserves the right to terminate the order or to reschedule the shipment within a reasonable period of time, and Buyer will not be entitled to refuse delivery or otherwise be relieved of any obligations as the result of such delay. Products as to which delivery is delayed due to any cause within Buyer's control may be placed in storage by Seller at Buyer's risk and expense and for Buyer's account. Orders in process may be canceled only with Seller's written consent and upon payment of Seller's cancellation charges. Orders in process may not be changed except with Seller's written consent and upon agreement by the parties as to an appropriate adjustment in the purchase price therefor. Credit will not be allowed for Products returned without the prior written consent of Seller.

6. TITLE AND RISK OF LOSS. Notwithstanding the trade terms indicated above and subject to the provisions of Section 7 below and to Seller's right to stop delivery of Products in transit, title to and risk of loss of the Products will pass to Buyer upon delivery of possession of the Products by Seller to the carrier; provided, however, that title to any software incorporated within or forming a part of the Products shall at all times remain with Seller or the licensor(s) thereof, as the case may be.

7. SECURITY INTEREST. Seller reserves and Buyer grants to Seller a purchase money security interest in all Products until such time as Buyer fully pays for such Products. Buyer appoints Seller as Power of Attorney to sign and file a financing statement.

8. WARRANTY. Seller warrants that the Products will operate or perform substantially in conformance with Seller's published specifications and be free from defects in material and workmanship, when subjected to normal, proper and intended usage by properly trained personnel, for the period of time set forth in the product documentation, published specifications or package inserts. If a period of time is not specified in Seller's product documentation, published specifications or package inserts, the warranty period shall be one (1) year from the date of shipment to Buyer for equipment and ninety (90) days for all other products (the "Warranty Period"). Seller agrees during the Warranty Period, to repair or replace, at Seller's option, defective Products so as to cause the same to operate in substantial conformance with said published specifications; provided that Buyer shall (a) promptly notify Seller in writing upon the discovery of any defect, which notice shall include the product model and serial number (if applicable) and details of the warranty claim; and (b) after Seller's review, Seller will provide Buyer with service data and/or a Return Material Authorization ("RMA") which may include biohazard decontamination procedures and other product-specific handling instructions, then, if applicable, Buyer may return the defective Products to Seller with all costs prepaid by Buyer. Replacement parts may be new or refurbished, at the election of Seller. All replaced parts shall become the property of Seller. Shipment to Buyer of repaired or replacement Products shall be made in accordance with the Delivery provisions of the Seller's Terms and Conditions of Sale. Consumables are expressly excluded from this warranty.

Notwithstanding the foregoing, Products supplied by Seller that are obtained by Seller from an original manufacturer or third party supplier are not warranted by Seller, but Seller agrees to assign to Buyer any warranty rights in such Product that Seller may have from the original manufacturer or third party supplier, to the extent such assignment is allowed by such original manufacturer or third party supplier.

In no event shall Seller have any obligation to make repairs, replacements or corrections required, in whole or in part, as the result of (i) normal wear and tear, (ii) accident, disaster or event of force majeure, (iii) misuse, fault or negligence of or by Buyer, (iv) use of the Products in a manner for which they were not designed, (v) causes external to the Products such as, but not limited to, power failure or electrical power surges, (vi) improper storage and handling of the Products or (vii) use of the Products in combination with equipment or software not supplied by Seller. If Seller determines that Products for which Buyer has requested warranty services are not covered by the warranty hereunder, Buyer shall pay or reimburse Seller for all costs of investigating and responding to such request at Seller's then prevailing time and materials rates. If Seller provides repair services or replacement parts that are not covered by this warranty, Buyer shall pay Seller therefor at Seller's then prevailing time and materials rates. ANY INSTALLATION, MAINTENANCE, REPAIR, SERVICE, RELOCATION OR ALTERATION TO OR OF, OR OTHER TAMPERING WITH, THE PRODUCTS PERFORMED BY ANY PERSON OR ENTITY OTHER THAN SELLER WITHOUT SELLER'S PRIOR WRITTEN APPROVAL, OR ANY USE OF REPLACEMENT PARTS NOT SUPPLIED BY SELLER, SHALL IMMEDIATELY VOID AND CANCEL ALL WARRANTIES WITH RESPECT TO THE AFFECTED PRODUCTS.

THE OBLIGATIONS CREATED BY THIS WARRANTY STATEMENT TO REPAIR OR REPLACE A DEFECTIVE PRODUCT SHALL BE THE SOLE REMEDY OF BUYER IN THE EVENT OF A DEFECTIVE PRODUCT. EXCEPT AS EXPRESSLY PROVIDED IN THIS WARRANTY STATEMENT, SELLER DISCLAIMS ALL OTHER WARRANTIES, WHETHER EXPRESS OR IMPLIED, ORAL OR WRITTEN, WITH RESPECT TO THE PRODUCTS, INCLUDING WITHOUT LIMITATION ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. SELLER DOES NOT WARRANT THAT THE PRODUCTS ARE ERROR-FREE OR WILL ACCOMPLISH ANY PARTICULAR RESULT.

9. INDEMNIFICATION.

9.1 By Seller. Seller agrees to indemnify, defend and save Buyer, its officer, directors, and employees from and against any and all damages, liabilities, actions, causes of action, suits, claims, demands, losses, costs and expenses (including without limitation reasonable attorney's fees) ("Indemnified Items") for (i) injury to or death of persons or damage to property to the extent caused by the negligence or willful misconduct of Seller, its employees, agents or representatives or contractors in connection with the performance of services at Buyer's premises under this Agreement and (ii) claims that a Product infringes any valid United States patent, copyright or trade secret; provided, however, Seller shall have no liability under this Section to the extent any such Indemnified Items are caused by either (i) the negligence or willful misconduct of Buyer, its employees, agents or representatives or contractors, (ii) by any third party, (iii) use of a Product in combination with equipment or software not supplied by Seller where the Product would not itself be infringing, (iv) compliance with Buyer's designs, specifications or instructions, (v) use of the Product in an application or environment for which it was not designed or (vi) modifications of the Product by anyone other than Seller without Seller's prior written approval. Buyer shall provide Seller prompt written notice of any third party claim covered by Seller's indemnification obligations hereunder. Seller shall have the right to assume exclusive control of the defense of such claim or, at the option of the Seller, to settle the same. Buyer agrees to cooperate reasonably with Seller in connection with the performance by Seller of its obligations in this Section.

Notwithstanding the above, Seller's infringement related indemnification obligations shall be extinguished and relieved if Seller, at its discretion and at its own expense (a) procures for Buyer the right, at no additional expense to Buyer, to continue using the Product; (b) replaces or modifies the Product so that it becomes non-infringing, provided the modification or replacement does not adversely affect the specifications of the Product; or (c) in the event (a) and (b) are not practical, refund to Buyer the amortized amounts paid by Buyer with respect thereto, based on a five (5) year amortization schedule. THE FOREGOING INDEMNIFICATION PROVISION STATES SELLER'S ENTIRE LIABILITY TO BUYER FOR THE CLAIMS DESCRIBED HEREIN.

9.2 By Buyer. Buyer shall indemnify, defend with competent and experienced counsel and hold harmless Seller, its parent, subsidiaries, affiliates and divisions, and their respective officers, directors, shareholders and employees, from and against any and all damages, liabilities, actions, causes of action, suits, claims, demands, losses, costs and expenses (including without limitation reasonable attorneys' fees and disbursements and court costs) to the extent arising from or in connection with (i) the negligence or willful misconduct of Buyer, its agents, employees, representatives or contractors; (ii) use of a Product in combination with equipment or software not supplied by Seller where the Product itself would not be infringing; (iii) Seller's compliance with designs, specifications or instructions supplied to Seller by Buyer; (iv) use of a Product in an application or environment for which it was not designed; or (v) modifications of a Product by anyone other than Seller without Seller's prior written approval.

10. SOFTWARE. With respect to any software products incorporated in or forming a part of the Products hereunder, Seller and Buyer intend and agree that such software products are being licensed and not sold, and that the words "purchase", "sell" or similar or derivative words are understood and agreed to mean "license", and that the word "Buyer" or similar or derivative words are understood and agreed to mean "licensee". Notwithstanding anything to the contrary contained herein, Seller or its licensor, as the case may be, retains all rights and interest in software products provided hereunder.

Seller hereby grants to Buyer a royalty-free, non-exclusive, nontransferable license, without power to sublicense, to use software provided hereunder solely for Buyer's own internal business purposes on the hardware products provided hereunder and to use the related documentation solely for Buyer's own internal business purposes. This license terminates when Buyer's lawful possession of the hardware products provided hereunder ceases, unless earlier terminated as provided herein. Buyer agrees to hold in confidence and not to sell, transfer, license, loan or otherwise make available in any form to third parties the software products and related documentation provided hereunder. Buyer may not disassemble, decompile or reverse engineer, copy, modify, enhance or otherwise change or supplement the software products provided hereunder without Seller's prior written consent. Seller will be entitled to terminate this license if Buyer fails to comply with any term or condition herein. Buyer agrees, upon termination of this license, immediately to return to Seller all software products and related documentation provided hereunder and all copies and portions thereof.

Certain of the software products provided by Seller may be owned by one or more third parties and licensed to Seller. Accordingly, Seller and Buyer agree that such third parties retain ownership of and title to such software products. The warranty and indemnification provisions set forth herein shall not apply to software products owned by third parties and provided hereunder.

11. LIMITATION OF LIABILITY. NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED HEREIN, THE LIABILITY OF SELLER UNDER THESE TERMS AND CONDITIONS (WHETHER BY REASON OF BREACH OF CONTRACT, TORT, INDEMNIFICATION, OR OTHERWISE, BUT EXCLUDING

LIABILITY OF SELLER FOR BREACH OF WARRANTY (THE SOLE REMEDY FOR WHICH SHALL BE AS PROVIDED UNDER SECTION 8 ABOVE)) SHALL NOT EXCEED AN AMOUNT EQUAL TO THE LESSER OF (A) THE TOTAL PURCHASE PRICE THERETOFORE PAID BY BUYER TO SELLER WITH RESPECT TO THE PRODUCT(S) GIVING RISE TO SUCH LIABILITY OR (B) ONE MILLION DOLLARS ($1,000,000). NOTWITHSTANDING ANYTHING TO THE CONTRARY CONTAINED HEREIN, IN NO EVENT SHALL SELLER BE LIABLE FOR ANY INDIRECT, SPECIAL, CONSEQUENTIAL OR INCIDENTAL DAMAGES (INCLUDING WITHOUT LIMITATION DAMAGES FOR LOSS OF USE OF FACILITIES OR EQUIPMENT, LOSS OF REVENUE, LOSS OF DATA, LOSS OF PROFITS OR LOSS OF GOODWILL), REGARDLESS OF WHETHER SELLER (a) HAS BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES OR (b) IS NEGLIGENT.

12. EXPORT RESTRICTIONS. Buyer acknowledges that each Product and any related software and technology, including technical information supplied by Seller or contained in documents (collectively "Items"), is subject to export controls of the U.S. government. The export controls may include, but are not limited to, those of the Export Administration Regulations of the U.S. Department of Commerce (the "EAR"), which may restrict or require licenses for the export of Items from the United States and their re-export from other countries. Buyer shall comply with the EAR and all other applicable laws, regulations, laws, treaties, and agreements relating to the export, re-export, and import of any Item. Buyer shall not, without first obtaining the required license to do so from the appropriate U.S. government agency; (i) export or re-export any Item, or (ii) export, re-export, distribute or supply any Item to any restricted or embargoed country or to a person or entity whose privilege to participate in exports has been denied or restricted by the U.S. government. Buyer shall cooperate fully with Seller in any official or unofficial audit or inspection related to applicable export or import control laws or regulations, and shall indemnify and hold Seller harmless from, or in connection with, any violation of this Section by Buyer or its employees, consultants, agents, or customers.

13. MISCELLANEOUS. (a) Buyer may not delegate any duties nor assign any rights or claims hereunder without Seller's prior written consent, and any such attempted delegation or assignment shall be void. (b) The rights and obligations of the parties hereunder shall be governed by and construed in accordance with the laws of the Commonwealth of Pennsylvania, without reference to its choice of law provisions. Each party hereby irrevocably consents to the exclusive jurisdiction of the state and federal courts located in Allegheny County, Pennsylvania, USA, in any action arising out of or relating to this Agreement and waives any other venue to which it may be entitled by domicile or otherwise. (c) In the event of any legal proceeding between the Seller and Buyer relating to this Agreement, neither party may claim the right to a trial by jury, and both parties waive any right they may have under applicable law or otherwise to a right to a trial by jury. Any action arising under this Agreement must be brought within one (1) year from the date that the cause of action arose. (d) The application to this Agreement of the U.N. Convention on Contracts for the International Sale of Goods is hereby expressly excluded. (e) In the event that any one or more provisions contained herein shall be held by a court of competent jurisdiction to be invalid, illegal or unenforceable in any respect, the validity, legality and enforceability of the remaining provisions contained herein shall remain in full force and effect, unless the revision materially changes the bargain. (f) Seller's failure to enforce, or Seller's waiver of a breach of, any provision contained herein shall not constitute a waiver of any other breach or of such provision. (g) Unless otherwise expressly stated on the Product or in the documentation accompanying the Product, the Product is intended for research only and is not to be used for any other purpose, including without limitation, unauthorized commercial uses, in vitro diagnostic uses, ex vivo or in vivo therapeutic uses, or any type of consumption by or application to humans or animals. (h) Buyer agrees that all pricing, discounts and technical information that Seller provides to Buyer are the confidential and proprietary information of Seller. Buyer agrees to (1) keep such information confidential and not disclose such information to any third party, and (2) use such information solely for Buyer's internal purposes and in connection with the Products supplied hereunder. Nothing herein shall restrict the use of information available to the general public. (i) Any notice or communication required or permitted hereunder shall be in writing and shall be deemed received when personally delivered or three (3) business days after being sent by certified mail, postage prepaid, to a party at the address specified herein or at such other address as either party may from time to time designate to the other.

To receive other Fisher Scientific publications, please add your name to our list.
